29.	xxxx-xxxx	Optional-III (from the list)	3(3+0)	Nil
30.	xxxx-xxxx	Optional-IV (from the list)	3(3+0)	Nil
Major Courses Credit Hours Total			90	

6. Interdisciplinary/Allied courses: minimum 12 credit hours:

(FOUR COURSES WILL SELECTED FROM THE FOLLOWING LIST)

1.	ECON-5112	Introduction to Economics	3 (3+0)	Nil
2.	PSYC-5101	Introduction to Psychology	3 (3+0)	Nil
3.	ULAW-5130	Introduction to Basic Laws	3 (3+0)	Nil
4.	POLS-5101	Political Science	3 (3+0)	Nil
5.	GEOG-5101	Fundamentals of Geography	3 (3+0)	Nil
6.	GEOG-6111	Geographical Information System	3 (3+0)	Nil
Interdisciplinary Courses Credit Hours Total			12	

7. Field experience/internship: Minimum 03 credit hours:

Lasting 6-8 weeks and ideally scheduled during summer breaks.

1.	SOCI-6125	Internship	03 (0+3)
-----------	------------------	-------------------	-----------------

7.

Thesis: Minimum 03 credit hours:

This project, after the sixth semester, requires faculty supervision and evaluation following department guidelines

1.	SOCI-6124	Capstone Project *	03 (3+0)
-----------	------------------	---------------------------	-----------------

- * Students will conduct the Capstone Project in groups of 3 to 5 members, individual Capstone Project may be allowed with the prior permission of chairman.

Course Description:

The course aims at providing understanding of a writer's goal of writing (i.e. clear, organized and effective content and to use that understanding and awareness for academic reading and writing. The objectives of the course are to make the students acquire and master the grammatical academic writing skills. The course would enable the students to develop argumentative writing techniques. The students would be able to logically add specific details on the topics such as facts, examples and statistical or numerical values. The course will also provide insight to convey the knowledge and ideas in an objective and persuasive manner. Furthermore, the course will also enhance the students' understanding of ethical considerations in writing academic assignments and topics including citation, plagiarism, formatting and referencing the sources as well as the technical aspects involved in referencing.

Course Contents:

1. Developing Analytical Skills
2. Transitional devices (word, phrase and expressions)
3. Development of ideas in writing
4. Reading Comprehension
5. Precis Writing
6. Developing argument
7. Sentence structure: Accuracy, variation, appropriateness, and conciseness
8. Appropriate use of active and passive voice
9. Organization and Structure of a Paragraph
10. Organization and structure of Essay
11. Types of Essays

Suggested Books:

1. Computing Essentials 2021 by Timothy J. O'Leary and Linda I. O'Leary, McGraw Hill Higher Education; 26th edition.
2. Computers: Understanding Technology by Fuller, Floyd; Larson, Brian: edition 2018.

Introductory/compulsory foundation course

Islamic Studies engages in the study of Islam as a textual tradition inscribed in the fundamental sources of Islam; Qur'an and Hadith, history and particular cultural contexts. The area seeks to provide an introduction to and a specialization in Islam through a large variety of expressions (literary, poetic, social, and political) and through a variety of methods (literary criticism, hermeneutics, history, sociology, and anthropology). It offers opportunities to get fully introductory foundational bases of Islam in fields that include Qur'anic studies, Hadith and Seerah of Prophet Muhammad (PBUH), Islamic philosophy, and Islamic law, culture and theology through the textual study of Qur'an and Sunnah.

- To make students understand the relevance and pragmatic significance of Islam in their lives.
- To make learners comprehend the true spirit of Islam with reference to modern world.
- To generate a sense of Islamic principles as a code of living that guarantee the effective solutions to the current challenges of being.
- To provide Basic information about Islamic Studies
- To enhance understanding of the students regarding Islamic Civilization
- To improve Students skill to perform prayers and other worships
- To enhance the skill of the students for understanding of issues related to faith and religious life.

Contents:**Introduction to Qur'anic Studies**

- 1) Basic Concepts of Qur'an
- 2) History of Quran
- 3) Uloom-ul-Quran

Course Description:

Sociology is the study of society, patterns of social relationships, social interaction, and culture that surrounds everyday life. It is a social science that uses various methods of empirical investigation and critical analysis to develop a body of knowledge about social order and social change. Subject matter can range from micro-level analyses of society to macro-level analyses. The course is designed to introduce the students with basic sociological concepts and to get familiarity with the overall discipline. The focus of the course shall be on basic concepts like scope and significance of Sociology, How Sociology is related as well as distinct from other social sciences. It focuses on the constituent parts of the society i.e. social systems and structures, socio-economic changes and social processes. This will also give an understanding of the Culture, elements of culture and the relationship of culture and personalities. The course will provide due foundation for further studies in the field of sociology.

Learning Outcomes:

By the end of this course, students will be able to:

1. Define and explain key sociological concepts and theories.
2. Analyze the reciprocal relationship between individuals and society.
3. Understand the impact of social structure, culture, and institutions on human behavior.
4. Identify and analyze patterns of social interaction and socialization processes.
5. Examine social inequality, stratification, and social mobility.
6. Explore the role of social change and social movements in society.
7. Apply sociological perspectives to analyze contemporary social issues.
8. Develop critical thinking and analytical skills through the study of sociological research and theories.

Course Contents:**Introduction to Sociology**

- Defining sociology, nature and its scope
- The sociological imagination
- Major sociological perspectives/paradigm
- Methods of studying sociology

Society and Community

- Origin and types of society
- Hunting and gathering society
- Horticulture Society
- Agriculture Society
- Industrial Post Industrial society

Culture and Society

- Understanding culture, its components, types
- Culture and social control
- Cultural relativism and Ethnocentrism
- Socialization and the process of acquiring culture
- Assumptions of culture

Socialization and Personality

- Defining socialization, Nature verses Nurture
- Agents of Socialization
- Socialization as a process
- Theories of Personality development

Course Description:

This course explores the foundations, principles, and methodologies involved in the development of theories in the social sciences. Students will examine the nature of theories, their functions, and the processes through which theories are constructed and refined. The course emphasizes critical thinking, creativity, and rigorous analysis in constructing and evaluating social theories. The course will provide familiarity about history of social thought, stages of social development and change. It will emphasize contributions of Western, Eastern and Muslim Thinkers towards social thought and social development. This course will enable the students to develop and apply a comparative perspective to explain the diversity of human social history and how different thinkers corresponded to various processes of social change in the course of social history.

Learning Objectives:

By the end of this course, students will be able to:

- Understand the nature and purpose of theories in the social sciences.
- Identify the key components and characteristics of a well-developed theory.
- Evaluate and critique existing social theories and develop skills in constructing and refining social theories.
- Analyze the interplay between empirical evidence and theoretical frameworks and apply theoretical frameworks to explain social phenomena.
- Engage in critical thinking and analysis in theory development with enhanced written and oral communication skills in discussing theoretical concepts.

Course Outline:**Introduction to Social Thought and theory**

- The historical sketch
- Introduction to Social Thought
- Difference between social thought and sociological theory
- Early Social Thought: Folk Thinking, Greek, Egyptian, Babylonian, Indian Social Thought
- Contribution of Muslim Thinkers in Social thought

Development of social theory

- Components of social theory
- Social and intellectual forces in the development of sociological theory

Classical Social Thinkers

- Henry Saint Simon
- August Comte
- Hegel
- Karl Marx
- Emile Durkheim
- Max Weber
- Goerge Simmel

Major theoretical Perspectives

- Difference between perspective and paradigm
- Structural Functionalism
- Symbolic Interactionism
- Conflict Perspective

Recommended Texts:

- 1 Ritzer, G. (2017). Sociological theory. (11thed.). New York: McGraw Hill Book Co.
- 2 Turner J.H. (2003). The structure of sociological theory. (7thed.). Australia: Thomson Wadsworth

- 3 Kinlock, G. C. (1987). Sociological theory: Its development and major paradigms. New York: Harcourt Brace Jovanarich.

Course Description:

The course aims to make students learn about the nature and structure of Pakistani society. Pakistan has a rich and unique culture that has preserved established traditions throughout history. It aims to impart knowledge about national culture and sub-cultures of Pakistan especially regarding their customs, values and traditions. The course will develop understanding about the integrated function of various social institutions in the country and discuss the five basic institutions with their structure and functions. This course will also discuss the social stratification in different sub-cultures of Pakistan. It also addresses various components of Pakistani Society are integrated in order to understand the broader socio historical context of Pakistani Society. This course also discusses the major social problems of Pakistan, their causes and remedies to eradicate them. In this course, major economic and productive activities of Pakistani culture will also be discussed with their problems and solutions of those problems will also be discussed.

Course Outline:**1. Introduction**

- Definition of Society
- Culture, its assumption, Multi culturalism,
- Historical evolution of Pakistani society
- Characteristics of Pakistani Society
- Social Stratification, Cast, Class & Ethnicity
- Social Institutions in Pakistan
 - i. Family
 - ii. Religion
 - iii. Economy
 - iv. Politics
 - v. Education
 - vi. Recreational

2. Educational Dynamics

- Illiteracy
- Literacy
- Universal Primary Education Concept
- Schools; Technical & Higher Education
- Status of Formal and Informal Education

3. Historical Perspective of Pakistani Culture

- Provincial Culture
 - a. Culture of Punjab
 - b. Culture of Sindh
 - c. Culture of NWFP
 - d. Culture of Balochistan
 - e. Culture of Kashmir & Northern Areas

4. *Urban and Rural Division of Pakistan*
 - a. **Rural Society**
 - b. **Urban Society**
5. *Minority and Their Belief*
6. *Major Social Problem*
7. *Major Occupation and Production Activities*

Recommended Books:

- 2 Lindholm, C. (1996). Frontier Perspective: Essay in comparative anthropology. Karachi: Oxford University Press. p.196.

Course Description:

Since ancient times, numbers, quantification, statistics and mathematics has played a central role in scientific and technological development. In the 21st century, Quantitative Reasoning (QR) skills are essential for life as they help to better understand socio-economic, political, health, education, and many other issues, an individual now faces in daily life. The skills acquired by taking this course will help the students to apply QR methods in their daily life and professional activities. This course will also change student's attitude about statistics and mathematics. It will not only polish their QR skills, but also enhance their abilities to apply these skills.

Contents

1. Introduction to quantitative reasoning
2. Overview of contributions of Mathematicians and Statisticians especially Muslim scholars.
3. Types of standard numbers
4. Proportions, rates, ratio and percentages
5. Odds and odds ratio
6. Scale of measurements
7. Number sequence and series
8. Unit analysis as a problem-solving tool
9. Data handling (small and large)
10. Data errors, absolute and relative and their applications
11. Descriptive statistics
12. Rules of counting: multiplication rule, factorial, permutation and combination
13. Probability and its application in real life
14. A graphical perspective through Venn Diagram
15. Financial indicator analysis, and money management (profit, loss, simple and compound interest)
16. Practical scenarios involving algebraic expressions: linear and quadratic

Recommended Texts:

1. Akar, G. K., Zembat, İ. Ö., Arslan, S., & Thompson, P. W. (2023). *Quantitative Reasoning in Mathematics and Science Education*. 1st Ed., Springer, USA.
2. Peck, R., Olsen, C., & Devore, J. L. (2015). *Introduction to statistics and data analysis*. 5th Ed., Brooks Cole, USA.
3. Devlin, K. J. (2012). *Introduction to mathematical thinking*. Palo Alto, CA: Keith Devlin.

Suggested Readings:

1. Triola, M. F., Goodman, W. M., Law, R., & Labute, G. (2006). *Elementary statistics*. Reading, MA: Pearson/Addison-Wesley.
2. Blitzer, R., & White, J. (2005). *Thinking mathematically*. Pearson Prentice Hall.

Course Description:

The course will enable students to explore human experiences, cultivate an appreciation of the past, enrich their capacity to participate in the life of their times, and enable an engagement with other cultures and civilizations, both ancient and modern. But independently of any specific application, the study of these subjects teaches understanding and delight in the highest achievements of humanity. The three components of the course, including fables, wisdom literature and epic, will enable the learners to explore and understand the classic tradition in literature. Development of personal virtue, a deep Sufi ethic and an unwavering concern for the permanent over the fleeting and the ephemeral are some of the key themes explored in the contents that will develop an intimate connection between literature and life.

Contents:**1. Fables**

The Fables of Bidpai
The Lion and the Bull
The Ring-dove
The Owls and the Crows

Selected poem from Bang-i-Dara

2. Gulistan-e- Sa'di

Ten ḥikāyāt from John T. Platts, *The Gulistan*

3. Epic

The Shāhnāma of Firdausi

Recommended Texts:

1. John T. P. (1876). *The Gulistan; or, Rose Garden of Shaikh Muslihu'd- Dīn Sa'dī of Shīrāz*. London: Wm. II. Allen.
2. Chishti, Y.S. (1991). *Sharah-i bāng-i darā*. Lāhaur: Maktaba-i ta'mīr-i insāniyat

Suggested Readings:

1. Thackston, W. (2000). *A Millennium of Classical Persian Poetry*. Maryland: Ibex Publishers.
2. Wood, R. (2013). *Kalila and Dimna: Fables of Conflict and Intrigue*. United Kingdom: Medina Publishing, Limited.

Course Description:

This course will introduce students with the subject matter of social science, its scope, nature and ways of looking at social phenomenon. It will make the participants acquaintance with the foundations of modern society, state, law, knowledge and selfhood. While retaining a focus on Pakistani state and society, students will encounter theoretical concepts and methods from numerous social science disciplines, including sociology, politics, economics anthropology and psychology and make them learn to think theoretically by drawing on examples and case studies from our own social context. Students will be introduced to the works of prominent social theorists from both western and non-western contexts. Instruction will include the use of written texts, audio-visual aids and field visits.

Learning Outcomes:

The course has following outcomes:

It will

- Introduce student with the nature of human social behavior and foundations of human group life
- Analyze the reciprocal relationship between individuals and society.
- Make student aware with the nature of societies existing in modern world
- Make students familiar with the philosophy of knowledge of social sciences
- Introduce students with the works of prominent theories explain human group behavior
- Help students to understand the foundations of society including culture, socialization, politics and economy
- Introduce students with various dimensions of social inequalities with reference to gender, race, ethnicity and religion
- Make them aware about the understanding of various themes pertains to social science in local context
- Help them recognize the difference between objective identification of empirical facts, and subjective formulation of opinionated arguments

Course Outlines:**1. Introduction to Social Sciences**

- Social world, Human Social behavior, Foundations of society
- Evolution of Social sciences
- Philosophy of Science
- Scope and nature of social sciences
- Modernity and social sciences
- Branches of social science: Sociology, Anthropology, Political Science, Economics
- **Society and Community, Historical evolution of Society**
- Types of Societies
- Foraging society, Horticultural society, Pastoralist society
- Agrarian societies, Industrial society, Postindustrial society

2. Philosophy of Knowledge in social Science and social inquiry

- Understanding social phenomenon
- Alternative ways of knowing

- Science as a source to explore social reality
- Objectivity, Value-Free research
- Positivism vs Interpretivism
- Qualitative vs Quantitative

3. **Culture and Society**

- Idea of Culture, Assumptions of Culture
- Types, Components, Civilization and culture
- Individual and culture. Cultural Ethnocentrism, Cultural Relativism
- Outlook of Pakistani culture
- Global Flows of culture, Homogeneity, Heterogeneity

4. **Social Stratification and Social inequality**

- Dimensions of inequality, Social class
- Gender, Race, Religion, Ethnicity, Caste
- Patterns of social stratification in Pakistan
- Class, caste system in agrarian society
- Ascription vs Achievement, Meritocracy
- Global stratification in modern world, Global patterns of inequality

5. **Personality, Self and Socialization**

- Concept of self, Personality
- Nature vs Nurture, Biological vs Social
- Development of Personality
- Socialization as a process, Agents of socialization
- Socialization and self/group identity

6. **Gender and Power**

- Understanding Gender
- Social construction of Patriarchy
- Feminism in Historical context, Gender Debates
- Gender and Development
- Gender issues in Pakistani society, Women Participation in politics, economy and education
- Toward a gender sensitive society, Gender mainstreaming

7. **Pakistan: State, Society, Economy and Polity**

- Colonialism, colonial legacy, National identity
- Transformation in Pakistani society: Traditionalism vs Modernism
- Economy, Informality of Economy, Modern economy and Pakistan
- Political Economy, Sociology of Economy

Semester/Level	In some discipline 1 st semester and in some discipline 2 nd Semester/ ADP Program 1 st Year
Course Code	URCQ-5111
Course Title	Translation of the Holy Quran - I
Credit Hours	1(0-1)
Objectives	<ul style="list-style-type: none"> To familiarize the students to keys and fundamentals of recitation of the holy Quran. To develop the skill of the students of recitation the last revelation. Students will learn the basic Arabic grammar in a practical way. To develop an eagerness among the students to explore the last divine Book.
Course Contents:	<p>تیسواں پارہ - ناظرہ مع تاجوید بنیادی عربی گرامر اسم اور اس کے منوعات : اسم ناعل ، مفعول ، تفضیل ، مبالغہ فعل اور اس کی اقسام : ماضی ، مضارع ، امر ، زہی حرف اور اس کی اقسام : حروف علت ، حروف جارہ ، مشبہ بالفاعل تیسویں پارے کی آخری بیس سورتوں (حفظ مع ترجمہ)</p>
Memorization:	

Course Description:

The course is built on the foundation of Sociology-1 course. It is mostly concerned with the learning of concepts about Group dynamics, Human ecology and processes of change. This course also includes the process and systems of social stratification in the society. Collective behavior and its various types will be discussed to make an understanding of this behavior of members of society. Contemporary topics like mass media, especially social media and different forms of electronic media will be taught in the course. This will familiarize the student with the globalization as well as globalisation. The indigenous knowledge of Pakistani society will enable the students becoming proactive citizens by implementing their sociological imagination. This course will also provide basic knowledge about gender relations in the society and briefly discussed the gender related concepts. Social change is inevitable part of the society so without making understanding of change forms, causes and process its very difficult to understand the dynamic part of the society therefore through this course students will learn the change in society.

Learning Outcomes:

By the end of this course, students will be able to:

- Analyze the interplay between social structures, culture, and individual agency.
- Understand the dynamics of social institutions and their impact on society.
- Examine processes of social change, globalization, and their consequences.
- Explore the formation and impact of social movements and collective action.
- Apply sociological theories and concepts to analyze contemporary social issues.
- Evaluate and interpret sociological research and data.
- Develop critical thinking and analytical skills through sociological analysis.
- Enhance written and oral communication skills through sociological discourse.

Course Contents:**Social Stratification, Inequality and Social class**

Sociological foundations of stratification

- Social class and socioeconomic status
- Race, Ethnicity, and inequality
- Social mobility
- Gender and inequality
- Global Stratification

Social Institutions

- Family as an institution and its function
- Religion as a social institution
- Education as a social institution
- Political systems and governance
- Economy and work in society

Social Change

- Causes and types of social change, factors of social change

- Theories of social change: Classical, Neo classical and Modern
- Determinants of social change
- Social Change and resistance
- Globalization and its impact on societies
- Cultural globalization and cultural identity

Collective Behavior and Social movements

- Types of collective behavior: Crowd, Mob, Riot
- Social Movements, Theories of social movements
- Social movements and social change in global world

Human Ecology

- Ecological Processes
- Sociological perspectives on the environment
- Climate change and environmental hazardous and its social implication
- Environmental justice movements
- Sustainable development and social responsibility
- Ecological Problems of Pakistan

Population and Urbanization

- Understanding vital events
- Migration and its factors
- Haphazard urbanization and its socioeconomic implication

Sociology and Social Issues

- Applying sociological perspectives to contemporary social issues (e.g., poverty, globalization, climate change, technology)

Recommended Text:

Course Description:

Classical Sociology Theory is a course that examines the foundational theories and concepts in classical sociology. The course delves into the works of key sociological thinkers from the 19th and early 20th centuries, including Karl Marx, Max Weber, and Emile Durkheim. Students will explore the sociological perspectives and theoretical frameworks proposed by these theorists, as well as their contributions to the understanding of social phenomena and the dynamics of society.

Learning Outcomes:

By the end of this course, students will be able to:

- Understand the major theories and concepts in classical sociology.
- Analyze and evaluate the sociological perspectives of key classical sociologists.
- Examine the historical and intellectual context of classical sociological theories.
- Apply classical sociological theories to contemporary social issues and phenomena.
- Critically evaluate the strengths and limitations of classical sociological theories.
- Develop critical thinking and analytical skills in applying sociological theories.

Course Outline:**Introduction to Classical Social Theory**

- Social and Intellectual factors of early sociological theory
- French Revolution
- Definition and scope of classical sociology
- Overview of key thinkers and their contributions

Evolutionary Perspective and Structure Functionalism

- Henry Saint Simon
- August Comte: Positivism, Hierarchy of Science, Basic and applied Sociology, Law of three stages
- Herbert Spencer: The law of Social Evolution, Concept of Society, Laissez-faire
- Emile Durkheim: Social Facts, Durkheim's theory of social integration and solidarity, The division of labor and social cohesion, Anomie and social regulation
- Durkheim's examination of social change and the transition to modern society

Karl Marx and Conflict Theory

- Ralph Dahrendorf, Jeffery Alexander
- Marx's materialist conception of history
- Class struggle and the capitalist mode of production
- Alienation, exploitation, and social change, Marx's theory of historical materialism and social change

Max Weber and Theory of Social Action

- Weber's concept of social action and verstehen
- The Protestant Ethic and the Spirit of Capitalism
- Ideal types and the analysis of social institutions

- Weber's analysis of rationalization and the rise of bureaucracy

George Simmel's Sociology

- Social Interaction, Forms, Blasé Attitude, strangers, philosophy of money,
- Tragedy of culture, Fashion, Forms of individuality, Social Distance,
- Application of classical sociological theories to contemporary social issues

Recommended Texts:

- 1 Ritzer, G. (2017). Sociological theory. (11thed.). New York: McGraw Hill Book Co.

- 3 Fish, S. J. (2005). 'Defending the durkheimian tradition. religion, emotion and morality Aldershot: Ashgate Publishing.

Course Description:

This course introduces the discipline of anthropology and the work of anthropologists. It does so by focusing on a series of questions that anthropologists have developed compelling answers to like: Why do people believe different things? Why are some societies characterized by inequalities? How do people communicate who they are to others? And are people in advanced societies truly healthier and happier than those in less advanced societies? This “question-based” approach encourages students to ask these questions of their own culture and society as they think critically and actively engage with, and learn from, examples from throughout the world and throughout history. The main emphasis of cultural anthropology is on the study of cultural variation among humans. It is in contrast to social anthropology, which perceives cultural variation as a subset of a posited anthropological constant. Cultural anthropology has a rich methodology, including participant observation. Students will leave the course with a broad understanding of how anthropologists answer such questions and with a greater awareness of the cultural and social diversity that exists in the world.

Learning Outcomes:

Course Objectives:

By the end of this course, students will be able to:

- Define and explain the fundamental concepts and theories in cultural anthropology.
- Understand the methods and techniques used in ethnographic research.
- Analyze the interrelationships between culture, society, and individual behavior.
- Identify and critically evaluate the cultural practices, beliefs, and social institutions in various societies.
- Examine cultural diversity and the impact of globalization on local cultures.
- Recognize the ways in which cultural anthropology contributes to a broader understanding of human societies.
- Develop effective cross-cultural communication and intercultural competency skills.

Course Contents:**Introduction to Cultural Anthropology**

- Anthropology and Subfields of Anthropology,
- Scope and Significance of Cultural Anthropology
- Anthropological Research Methods
- Cultural Anthropology and other Social Sciences

Culture

- Definition, types and assumptions of culture
- Components of culture
- Culture and environment
- Schools of Thought in Cultural Anthropology
- Cultural Materialism, Structural Functionalism, Symbolic Anthropology
- Cultural ecology, Historical Particularism, Interpretive Anthropology,
- Feminist Anthropology, Poststructuralism Postcolonial Anthropology and Critical Anthropology

Language

- Origin of language
- Human and non-human language
- Features of human language
- Structure of Human language and relationship of language and culture
- Sapir-whorf Thesis, Socio-linguistics theory

Religion, Rituals, and Belief Systems

- The nature of religious, structure and function of religion, beliefs and practices
- Rituals and their social significance
- Shamanism, animism, monotheism, and polytheism

Types and Functions of family and marriage

- Social structures and institutions
- Kinship systems and family structures
- Marriage practices and kinship terminology, Types of Descent

Political Organization

- Origin, evolution and function of political organization
- Types of Political Institution: Tribe, bands, Chiefdoms, City States and Modern State System
- Gender and Sexuality
- Cultural construction of gender roles and expectations
- Cross-cultural variations in gender systems
- Diversity in sexual orientations and identities

Globalization and Cultural Change

- The impact of globalization on local cultures
- Cultural hybridity and the spread of consumerism
- Indigenous peoples and cultural resistance

Applied Anthropology and Contemporary Issues

- The role of cultural anthropology in addressing social issues
- Medical anthropology and global health
- Environmental anthropology and sustainability

Recommended Texts:

- 1 Kottak, Conrad Phillip. (2013). Cultural anthropology: Appreciating human diversity. New York :McGraw-Hill,
- 2 Bodley, H. J. (2016). Cultural anthropology: Tribes, states, and the global system. (6thed.). US: Rowman & Littlefield
- 3 Ember, R. C., Ember, M. and Peregrine, N. P. (2014). Social and cultural anthropology (14thed.). London: Pearson.

Suggested Readings:

- 2 Marvin, H. (2007). Cultural anthropology, (7thed.). New York: Harper and Row.

Course Description:

This course prepares undergraduates to become successful writers and readers of English. The course helps students develop their fundamental language skills with a focus on writing so that they can gain the confidence to communicate in oral and written English outside the classroom. The course is divided into five units and takes a Project-based Learning approach. Unit themes target the development of 21st century skills and focus on self-reflection and active community engagement. The course completion will enable the students to develop communication skills as reflective and self-directed learners. They will be able to intellectually engage with different stages of writing process, and develop analytical and problem-solving skills to address various community-specific challenges.

Contents:

1. **Self-Reflection**
 - Introduction to the basics of the writing process
 - Introduction to the steps of essay writing
 - Prewriting activities: Brainstorming, listing, clustering and freewriting
 - Practicing Outlining of the essay
2. **Personalized Learning**
 - Learning Process, Learning Styles, Goal Setting and Learning Plan
3. **Oral Presentation**
 - Structure and Significance, Content Selection and Slide Presentation, Peer Review
4. **Critical Reading Skills**
 - Introducing Authentic Reading (Dawn and non-specialist academic books/texts)
 - Reading Strategies and Practice: Skimming, scanning, SQW3R, Annotating, Detailed reading and note-taking, Standard Test Practice: TOEFL and IELTS, Model Review Reports and Annotated Bibliographies
5. **Community Engagement**
 - Student-led brainstorming on local versus global issues, Identifying research problems
 - Drafting research questions, Drafting interview/survey questions for community research (in English or L1)
 - Engaging students in Critical reading, Presenting interview/ survey information, Field work
 - Writing Community Engagement Project
6. **Letter to the Editor**
 - Types of letters, Format and purpose of letter to the editor, Steps in writing letter-to-editor

Recommended Texts:

1. Bailey, S. (2011). *Academic writing: A handbook for international students* (3rd ed.). New York: Routledge.
2. Swales, J. M., & Feak, C. B. (2012). *Academic writing for graduate students: Essential tasks and skills* (3rd ed.). Ann Arbor: The University of Michigan Press.

Suggested Readings:

1. Cresswell, G. (2004). *Writing for academic success*. London: SAGE.
2. Johnson-Sheehan, R. (2019). *Writing today*. Don Mills: Pearson.
3. Silvia, P. J. (2019). *How to write a lot: A practical guide to productive academic writing*. Washington: American Psychological Association.

Course Description:

This course is based on quantitative reasoning 1 course. It will enhance the quantitative reasoning skills learned in quantitative reasoning 1 course. Students will be introduced to more tools necessary for quantitative reasoning skills to live in the fast paced 21st century. Students will be introduced to importance of statistical and mathematical skills in different professional settings, social and natural sciences. These quantitative reasoning skills will help students to better participate in national and international issues like political and health issues. This course will prepare the students to apply quantitative reasoning tools more efficiently in their professional and daily life activities. This course will help them to better understand the information in form of numeric, graphs, tables, and functions.

Contents

1. Types of data and its graphical representation (Histogram, Stem and Leaf display, Box Plot, Scatter diagram, Histogram, Bar chart, etc)
2. Solving practical problems using linear and exponential models
3. Population growth models
4. Analytical approach to solve simultaneous equations
5. Inequalities and their application
6. Comparing quantities using analytical tools
7. Logical reasoning and their application in modern age
8. Logical reasoning and decision making
9. Data tendencies via measure of location
10. Variability and Measure of dispersion
11. Measuring relationships via Regression analysis and correlation
12. Statistical inference: sampling techniques, estimation techniques and hypothesis testing for decision and policy making

Recommended Texts:

1. Akar, G. K., Zembat, İ. Ö., Arslan, S., & Thompson, P. W. (2023). *Quantitative Reasoning in Mathematics and Science Education*. 1st Ed., Springer, USA.
2. Sharma, A. K. (2005). *Text book of elementary statistics*. Discovery Publishing House.
3. Blitzer, R. (2014). *Precalculus*, 5th Ed.. Pearson Education, Limited. New York

Suggested Readings:

1. Gupta, S. C., & Kapoor, V. K. (2020). *Fundamentals of mathematical statistics*. 12th Ed, Sultan Chand & Sons.
2. Aufmann, R. N., Lockwood, J., Nation, R. D., & Clegg, D. K. (2007). *Mathematical thinking and quantitative reasoning*. Cengage Learning
3. Blitzer, R., & White, J. (2005). *Thinking mathematically*. Pearson Prentice Hall.

Course Description:

The course is designed to acquaint the students of BS Programs with the rationale of the creation of Pakistan. The students would be apprised of the emergence, growth and development of Muslim nationalism in South Asia and the struggle for freedom, which eventually led to the establishment of Pakistan. The post-WWII withdrawal of Empires led to the emergence of nation states on the world map and Pakistan was created by Jinnah's successfully establishing Two Nations theory i.e. India was inhabited by two nations, the Hindus and the Muslims. This curriculum has been developed to help students analyze the socio-political and constitutional problems of Pakistan while highlighting various phases of its constitutional history before and after the partition and to develop a vision in them to become knowledgeable citizens of their homeland.

Contents:

1. Evolution of Muslim Nationalism in South Asia
2. Two Nations Theory and Pakistan Movement (1940-47)
3. Muhammad Ali Jinnah and Two Nations Theory
4. Objectives Resolution and Ideology of Pakistan
5. Hurdles and Issues in Constitution making Process in Pakistan
6. Political and Constitutional Developments in Pakistan (1947- to the present)
7. Principles of Jurisprudence
8. Prominent Features of Constitution of Pakistan 1973
9. Constitution of Pakistan and the State Structure
10. Fundamental Rights and Principles of Policy
11. Constitutional Amendments in Constitution of 1973
12. Universal Declaration of Human Rights and Constitution of Pakistan 1973

Recommended Texts:

1. *The Constitution of Islamic Republic of Pakistan 1973*
2. Hayat, Sikandar (ed.) (2023). *Pakistan Studies: A Book of Readings*. Lahore: Sang-e-Meel Publications.

Suggested Readings:

1. Hayat, Sikanadar (2016). *Aspects of Pakistan movement*. Islamabad: National Institute of Historical and Cultural Research.
2. Kazimi, M. R (2009). *A concise history of Pakistan*. Karachi: Oxford University Press.
3. Khan, Hamid (2005). *Constitutional and Political History of Pakistan*. Karachi: Oxford University Press.

Course Description:

The concepts about gender relations will be learnt. The historical movements and feminist perspectives about gender relations will be explored. The course will provide understanding about globalization and its role towards changing gender relation in various societies around the world. Special emphasis shall be given to Muslim and Pakistani societies. Specific areas of gender discrimination (both for men and women) will also be learnt. Learning outcomes of this course will be that it enable students to Identify and explain the ways in which gender shapes our everyday lives through the intersections of gender, race, class, sexuality, age, religion, culture, and nation. Critically analyze and evaluate major feminist and gender theories. Understand the historical and cultural diversity of gender constructs. Discuss the ways in which systems of power, privilege, and oppression shape our experiences as individuals and members of communities. Develop a critical vocabulary that includes key theoretical debates in historical and contemporary gender studies.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the concept of gender as a social construct and its implications for individuals and society.
2. Critically analyze theories and frameworks related to gender studies from multiple disciplines to recognize the intersections of gender with other social categories such as race, class, sexuality, and disability.
3. Identify and critique gender-based power structures and hierarchies in various social, cultural, and institutional contexts and examine the historical, cultural, and social construction of gender roles, identities, and expectations.
4. Evaluate the impact of gender on access to resources, opportunities, and social participation.
5. Engage in informed discussions on contemporary gender issues and debates.
6. Apply theoretical knowledge to analyze and address gender inequalities and promote gender justice and develop critical thinking and analytical skills to challenge gender stereotypes and promote inclusivity and equality.

Course Outline:

1. **Introduction**
 - Definition, Concepts and Importance
 - Gender Studies in International Setting
 - Gender Studies in Pakistani Perspective
 - Feminism
2. **Major Feminist Perspectives**
 - Liberal Feminism
 - Radical Feminism
 - Marxist Feminism
 - Theological Feminism
3. **Gender and Human Rights**

- Definition and Nature of Human Rights
- Collective Rights
- Ethnic Minority Rights
- Fundamental Rights
- Property Rights

4. **Gender and Politics**

- Gender and Third World Politics
- Women Political Leaders, Past and Present
- Women in the Legislatures and Executive of the Law
- Power and Patriarchy
- Women in Pakistani Political Setup
- Women Participation in Local Government System

5. **Gender and Education**

- Gender and education
- Gender, Origin and development of education
- Gender Education and religion
- Gender Education and polity
- Gender Education and economy
- Gender Education and social mobility
- Gender and Forms of education

6. **Gender and Population**

- Population composition
- Sex Composition
- Gender Roles and Family Size
- Gender and Reproductive Role
- Gender and Youth problem
- Gender and Population Issues
- Changing Perspective of Gender Roles in Population

7. **Gender and Development**

- Gender Roles
- Access to Resources
- Gender Disparity
- Problems of Gender Development
- The role of Development Aid in Gender development
- The role of non-government organizations in Gender development
- Journey from WID to GAD

Course Description:

Introduction to Demography is a comprehensive course that provides an understanding of the fundamental principles and methods of demography. The course explores the study of population size, composition, distribution, and dynamics. Students will examine the factors that influence population change, including fertility, mortality, migration, and aging. The course emphasizes the application of demographic concepts and techniques in analyzing population trends, patterns, and their implications for social, economic, and public health policies.

Learning Outcomes:

By the end of this course, students will be able to:

- Define and explain key demographic concepts and measures.
- Understand the methods and sources of demographic data collection.
- Analyze population size, structure, and distribution patterns.
- Examine factors influencing fertility, mortality, migration, and population growth.
- Apply demographic techniques to analyze population trends and projections.
- Evaluate the demographic implications for social, economic, and public health policies.
- Develop critical thinking and analytical skills in demography.

Contents:**Introduction to Demography**

- Definition and scope of demography
- Historical development of demography as a discipline
- Demographic transition theory and its significance

Data Sources and Methods in Demography

- Primary and secondary sources of demographic data
- Methods of data collection, including surveys and vital registration systems
- Sampling techniques and data quality issues

Population Size and Composition

- Measures of population size: crude birth rate, crude death rate, and net migration rate
- Age-sex structure and population pyramids
- Ethnicity, race, and other demographic characteristics

Fertility and Family Planning

- Fertility measures: total fertility rate, age-specific fertility rates
- Determinants of fertility: socioeconomic factors, cultural norms, and reproductive health
- Family planning programs and policies

Mortality and Health

- Mortality measures: crude death rate, infant mortality rate, life expectancy
- Causes of death and mortality differentials

- Health disparities and public health interventions

Migration and Urbanization

- Types of migration: internal migration, international migration, and urbanization
- Push and pull factors influencing migration
- Impacts of migration on sending and receiving areas

Population Growth and Aging

- Population growth models: exponential growth and logistic growth
- Aging population and its implications for society and policy
- Longevity, health, and quality of life in an aging society

Population Policies and Development

- Population policies: pronatalist and antinatalist approaches
- Population and development: demographic dividends and challenges
- Sustainable development goals and population dynamics

Demographic Analysis and Projections

- Demographic techniques: cohort analysis, rate calculations, and demographic indicators
- Population projections: methods and applications
- Demographic modeling and simulation

Demography and Contemporary Issues

- Applied demography: population forecasting, policy evaluation, and program planning
- Demographic issues in areas such as migration, environment, and social inequalities
- Ethical considerations in demographic research and policy

Recommended Texts:

Course Description:

This course addresses the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and potentially selling a business idea. The goal is to provide a solid background with practical application of important concepts applicable to the entrepreneurial environment. Entrepreneurial discussions regarding the key business areas of finance, accounting, marketing and management include the creative aspects of entrepreneurship. The course relies on classroom discussion, participation, the creation of a feasibility plan, and building a business plan to develop a comprehensive strategy for launching and managing a new venture.

Course Learning Objectives:

1. To enhance the 'entrepreneurial intentions' of the students by improving their natural willingness to start a business.
2. To understand the process of entrepreneurship and learn the ways to manage it by working individually in the class and in the form of groups outside the class to conduct field assignments.
3. To educate the students about the practical underpinnings of the entrepreneurship with the aid of practical assignments and idea pitching.

Contents:

1. **Background:**
What is an Organization, Organizational Resources, Management Functions, Kinds of Managers, Mintzberg's Managerial Roles.
2. **Forms of Business Ownership:**
The Sole proprietorship, Partnership, Joint Stock Company
3. **Entrepreneurship:**
The World of the Entrepreneur; what is an entrepreneur? The Benefits of Entrepreneurship, The Potential Drawbacks of Entrepreneurship, Behind the Boom: Feeding the Entrepreneurial Fire.
4. **The Challenges of Entrepreneurship:**
The Cultural Diversity in Entrepreneurship, The Power of "Small" Business, Putting Failure into Perspective, The Ten Deadly Mistakes of Entrepreneurship, How to Avoid the Pitfalls, Idea Discussions & Selection of student Projects, Islamic Ethics of Entrepreneurship.
5. **Inside the Entrepreneurial Mind:**
From Ideas to Reality: Creativity, Innovation, and Entrepreneurship, Creativity – Essential to Survival, Creative Thinking, Barriers to Creativity, How to Enhance Creativity, The Creative Process, Techniques for Improving the Creative Process, Protecting Your Ideas, Idea Discussions & Selection of student Projects.

6. **Products and technology, identification opportunities**
7. **Designing a Competitive Business Model and Building a Solid Strategic Plan:** Building a strategic plan, Building a Competitive Advantage, The Strategic Management Process, Formulate strategic options and select the appropriate strategies, Discussion about execution of Students' Project.
8. **Conducting a Feasibility Analysis and Crafting a Winning Business Plan:** Conducting a Feasibility Analysis, Industry and market feasibility, Porter's five forces model, Financial feasibility analysis. Why Develop a Business Plan, The Elements of a Business Plan, What Lenders and Investors Look for in a Business Plan, Making the Business Plan Presentation.
9. **Building a Powerful Marketing Plan:** Building a Guerrilla Marketing Plan, Pinpointing the Target Market, Determining Customer Needs and Wants Through Market Research. Plotting a Guerrilla Marketing Strategy: How to Build a Competitive Edge, Feed Back & Suggestions on Student Project, Islamic Ethics for Entrepreneurial Marketing
10. **E-Commerce and the Entrepreneur:** Factors to Consider before Launching into ECommerce, Ten Myths of E-Commerce, Strategies for E-Success, Designing a Killer Web Site, Tracking Web Results, Ensuring Web Privacy and Security, Feed Back & Suggestions on Student Project.
11. **Pricing Strategies:** Three Potent Forces: Image, Competition, and Value, Pricing Strategies and Tactics, Pricing Strategies and Methods for Retailers, The Impact of Credit on Pricing
12. **Attracting Venture Capitalist:** Projected Financial Statements, Basic Financial Statements, Ratio Analysis, Interpreting Business Ratios, Breakeven Analysis, Feed Back & Suggestions on Student Project,
13. **Idea Pitching:** Formal presentation, 5-minutes pitch, funding negotiation and launching.

Recommended Texts:

Course Description:

The Civics and Community Engagement course is designed to provide students with an understanding of the importance of civic participation, culture and cultural diversity, basic foundations of citizenship, group identities and the role of individuals in creating positive change within their communities. The course aims at developing students' knowledge, skills and attitudes necessary for active and responsible citizenship.

Learning outcomes:

After completing this course, students will be able to

- Understand the concepts of civic engagement, community development, and social responsibility.
- Understand rights and responsibilities of citizenship
- Understand cultural diversity in local and global context
- Analyze the significance of civic participation in promoting social justice, equity, and democracy.
- Examine the historical and contemporary examples of successful civic and community engagement initiatives.
- Identify and assess community needs, assets, and challenges to develop effective strategies for community improvement.
- Explore the ethical implications and dilemmas associated with civic and community engagement.
- Develop practical skills for effective community organizing, advocacy, and leadership.
- Foster intercultural competence and respect for diversity in community engagement efforts.
- Collaborate with community organizations, stakeholders, and fellow students to design and implement community-based projects.
- Reflect on personal growth and learning through self-assessment and critical analysis of community engagement experiences.

Course Content:**Introduction to Civics & Community Engagement**

- Overview of the course: Civics & Community Engagement
- Definition and importance of civics
- Key concepts in civics: citizenship, democracy, governance, and the rule of law
Rights and responsibilities of citizens

Citizenship and Community Engagement

- Introduction to Active Citizenship: Overview of the Ideas, Concepts, Philosophy and Skills
- Approaches and Methodology for Active Citizenship

Identity, Culture, and Social Harmony

- Concept and Development of Identity, Group identities

- Components of Culture, Cultural pluralism, Multiculturalism, Cultural Ethnocentrism, Cultural relativism, Understanding cultural diversity, Globalization and Culture, Social Harmony,
- Religious Diversity (Understanding and affirmation of similarities & differences)
- Understanding Socio-Political Polarization
- Minorities, Social Inclusion, Affirmative actions

Multi-cultural society and inter-cultural dialogue

- Inter-cultural dialogue (bridging the differences, promoting harmony)
- Promoting intergroup contact/ Dialogue
- Significance of diversity and its impact
- Importance and domains of Inter-cultural dialogue

Active Citizen: Locally Active, Globally Connected

- Importance of active citizenship at national and global level
- Understanding community
- Identification of resources (human, natural and others)
- Utilization of resources for development (community participation)
- Strategic planning, for development (community linkages and mobilization)

Human rights, constitutionalism and citizens' responsibilities

- Introduction to Human Rights
- Human rights in constitution of Pakistan
- Public duties and responsibilities
- Constitutionalism and democratic process

Social Institutions, Social Groups, Formal Organizations and Bureaucracy

- Types of Groups, Group identities, Organizations
- Bureaucracy, Weber's model of Bureaucracy
- Role of political parties, interest groups, and non-governmental organizations

Civic Engagement Strategies

- Grassroots organizing and community mobilization
- Advocacy and lobbying for policy change
- Volunteerism and service-learning opportunities

Social issues/Problems of Pakistan

- Overview of major social issues of Pakistani society

Social Action Project

Course Description:

The course "Social Psychology" explores the scientific study of how individuals think, feel, and behave in social contexts. Through theoretical frameworks, empirical research, and real-world examples, students will examine the influence of social factors on individuals' thoughts, emotions, and behaviors. The course will cover topics such as social perception, attitudes, persuasion, conformity, group dynamics, intergroup relations, and social influence. Students will gain an understanding of the principles and theories of social psychology and develop critical thinking skills to apply this knowledge to everyday social interactions.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the key theories, concepts, and methodologies of social psychology and analyze the impact of social factors on individual behavior, attitudes, and cognition.
2. Examine the processes of social perception, impression formation, and attribution and evaluate the role of social influence, conformity, and obedience in shaping behavior.
3. Understand the dynamics of group processes, including group formation, norms, and decision-making.
4. Explore the causes and consequences of prejudice, stereotypes, and discrimination and analyze the factors that influence interpersonal attraction, relationships, and prosocial behavior.
5. Recognize the principles of persuasion and the strategies used in advertising and propaganda.
6. Apply social psychological theories to understand and analyze real-world social issues.

Course Outline:

1. **Introduction:**
 - Definition and scope of social psychology
 - Historical development of social psychology
 - Methods and framework of social psychology
2. **Human Behavior & Personality:**
 - Psychological dynamics
 - Socio-cultural dynamics
 - Man as a psycho-bio-social unit.
 - Personality Development:
 - Socialization and personality development
 - Theories of personality development
3. **Theorists:**
 - Sigmund Freud
 - C.H. Cooley
 - B. F. Skinner
 - G. H. Mead.

4. **Cultural and Social Development:**
 - Universal cultural patterns
 - Cultural values and **inter-personal adjustment**

5. **Individual in Society:**
 - Interpersonal behavior
 - Attitudes (meaning, formation, and change) perception
 - Language (communication and change) motivation

6. **Group dynamics:**
 - Group life
 - Formation of groups
 - Dimensions of group effectiveness
 - Dynamics of Leadership:
 - Leadership
 - Role and status, psycho-social factors underlying roles
 - Types of leaderships
 - Group morale and leadership

7. **Stress in Social Behavior:**
 - Social behavior
 - Physically, psychologically, socially stressful situation, tension, frustration, stress, tension reduction.

8. **Psycho-social problems of Pakistani Society:**

Course Description:

The course "Fundamentals of Social Research" provides an introduction to the fundamental principles, methods, and processes of conducting research in the social sciences. It equips students with the necessary knowledge and skills to design, implement, and analyze social research studies. The course covers key aspects of research design, data collection methods, data analysis techniques, and ethical considerations in social research. Students will engage in hands-on exercises, critical evaluation of research literature, and practical application of research methods.

Learning Outcomes

After the completion of this course, students will be able to :

1. Understand the importance of social research in the social sciences and its role in advancing knowledge and understanding of human behavior and society.
2. Develop the ability to formulate research questions and hypotheses that are relevant and appropriate for social research studies.
3. Gain knowledge of different research designs and their applications, including experimental, survey, qualitative, and mixed-methods designs.
4. Acquire skills in designing and conducting research, including sampling techniques, questionnaire design, interview protocols, and data collection procedures.
5. Understand the ethical considerations and principles involved in social research, including informed consent, confidentiality, and protection of human subjects.
6. Develop critical evaluation skills to assess the quality, validity, and reliability of research literature and research studies in the social sciences.

Contents**1. Science and Research**

- Philosophy vs Science, Scientific Knowledge
- Types of knowledge
- Philosophies of Social research, Positivism, Interpretivism,
- Difference between natural sciences and social sciences

2. Introduction

- Scientific Method and Social Research
- Theory and Research
- Inductive and Deductive Research
- Research Process
- Research Orientation: Basic, Applied and Evaluative, Purpose of Research: Exploration, Description, Explanation, The Time Dimension: Cross-sectional Studies, Longitudinal Studies, Unit of Analysis: Individuals, Groups, Organizations, Steps of Social Research

3. Formulation of Research Problem

- Choosing the Problem and its Significance, Types and objectives of literature review, Sources of literature review, Annotated Bibliography, Referencing,

4. Developing conceptual Framework

5. The Derivation of Hypothesis

- Hypothesis and its types
- Errors in Hypothesis construction

6 Research Design and Components

- Measuring the Variable
- Conceptualization and Operationalization
- Developing indicators, level of measurement
- Type of variables

7. Validity and Reliability

- Types of reliability and validity
- Techniques to measure reliability and validity

8. Population and Sampling

- Universe, Population, Sample and sampling frame, Types of Sampling, Probability and Non-Probability Sampling techniques,

9. Ethics of Social Research

Text Books:

1. Babbie, Earl (2012). "The Practice of Social Research". 13th edition Belmont, California: Wordsworth.
2. Neuman William Lawrence. (2011) Social Research Methods 7th edition. Allyn and Eacon., Boston.

Suggested Books:

1. Bridget Somekh & Culhy. 2005. Research Methods in the Social Science. New Delhi: Vistaar Publisher.
2. Norman Blaikie, 2003, Analyzing Quantitative Data, Sage Publication London.
3. Mark Balnaves, (2001). Introduction to Quantitative Research Methods, Sage Publication.
4. Norman Blaikie, 2003, Analyzing Quantitative Data, Sage Publication London.

Course Description:

This course is meant to equip students with basic statistical skills and help prepare them for more advanced quantitative courses, graduate studies or a future career where some knowledge of statistics is required. The course seeks, in particular, to promote statistical literacy among students so that they can critically evaluate statistical information and data-based arguments appearing in diverse media outlets. It focuses on both descriptive and inferential techniques in highlighting the usefulness of statistics in understanding social behavior. This course does not require a strong mathematical background as a prerequisite, although ability with simple algebra will be an asset. The course begins with basic descriptive statistics and then moves on to inferential statistics. The descriptive part includes techniques such as frequency distribution, measures of central tendency and dispersion, standardized scores and the normal curve. The section on inferential statistics introduces students to hypothesis testing, estimation procedures, correlation, and linear regression techniques. Although the course requires computational work, conceptual understanding of the issues will be emphasized.

Contents:

- 1 Introduction, Elementary statistical concepts and notions
- 2 Meaning and Definition of Social Statistics, Use of Statistics in Modern Sociology
- 3 Grouped and Un-grouped Data, Statistics: Descriptive and Inductive
- 4 Measurement: Nominal, Ordinal and Interval scales
- 5 Frequency Distribution: Tabular Organization and Graphic Presentation of Data
- 6 Measures of Centrality and Location
- 7 Mean, Median and Mode
- 8 Percentiles, Deciles and Quartiles
- 9 Measures of Dispersion, Range, Mean Deviation, Standard Deviation
- 10 Variance, Quartile Deviation
- 11 The Normal Distribution, Form of the normal Curve, Area under the Normal Curve
- 12 Probability: Basic concepts, Rules of Probability, Binomial Probabilities
- 13 Non-Parametric Tests
- 14 Chi Square Test
- 15 Other Non-parametric Tests
- 16 The Sign Test, The Median Test
- 17 The Mann Whitney Test
- 18 Computer Application: Introduction to SPSS

Course Description:

The course "Sociology of Social Work" explores the intersection of sociology and social work, focusing on the social, cultural, and structural factors that shape social work practice. Through sociological perspectives, students will critically examine the societal context in which social work operates, including power dynamics, inequalities, and social systems. The course will address topics such as social work theories, social welfare policies, social work ethics, social justice, and the impact of social factors on individuals and communities. Students will develop a sociological understanding of social work practice and its role in addressing social problems and promoting social change.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the relationship between sociology and social work and how sociological perspectives inform social work practice.
2. Analyze the social, cultural, and structural factors that influence social problems and shape the lives of individuals and communities.
3. Understand the ethical considerations and dilemmas faced by social workers in their practice.
4. Analyze the role of social workers in addressing social problems and promoting social change.
5. Develop an understanding of the sociological dimensions of key social issues addressed by social workers.
6. Apply sociological concepts and theories to critically analyze social work case studies and interventions.
7. Reflect on the implications of sociological perspectives for enhancing the effectiveness and relevance of social work practice.

Course Content:**Introduction to Sociology of Social Work**

- Relationship between sociology and social work
- Sociological perspectives in understanding social problems and social work practice
- The social construction of social issues and their impact on individuals and communities

Social Work Theories and Approaches

- Overview of major social work theories (e.g., systems theory, strengths-based approach, ecological perspective)
- Application of social work theories in diverse social contexts
- Critiques and debates surrounding social work theories

Social Welfare Policies and Social Work Practice

- Social policies and their impact on social work practice
- Analysis of social welfare systems and their implications for social work interventions
- Social work advocacy and policy reform efforts

Social Inequalities and Power Dynamics

- Examination of social inequalities based on factors such as race, class, gender, and sexuality
- Intersectionality and its relevance to social work practice
- Power dynamics in social work relationships and interventions

Ethics in Social Work Practice

- Ethical considerations and dilemmas in social work practice
- Codes of ethics and professional standards in social work
- Ethical decision-making models and their application in social work contexts

Social Justice and Human Rights

- Concepts of social justice and human rights in social work
- Engaging with social justice issues in social work practice
- Promoting social change and challenging systemic oppression

Social Issues and Social Work Interventions

- Application of sociological perspectives to social issues addressed by social workers (e.g., poverty, homelessness, mental health, domestic violence)
- Analysis of social work interventions and strategies for addressing social problems
- Collaboration and interdisciplinary approaches in social work practice

Evaluation and Research in Social Work

- Importance of evaluation and research in informing evidence-based social work practice
- Ethical considerations in social work research
- Utilizing research findings to improve social work interventions and outcomes

Reflection on Sociological Perspectives in Social Work Practice

- Reflective practice in social work and the integration of sociology

Course Description:

This course builds upon foundational knowledge of social research methodologies and aims to deepen students' understanding and proficiency in advanced research techniques. Through a combination of theoretical discussions, practical exercises, and hands-on research projects, students will explore advanced quantitative and qualitative research methods, data analysis techniques, and ethical considerations in social research. The course emphasizes critical thinking, research design, data interpretation, and ethical decision-making in the context of social research. Students will develop the skills necessary to conduct rigorous, ethical, and impactful social research studies.

Learning Objectives:

By the end of this course, students will be able to:

1. Understand and critically evaluate advanced social research methodologies.
2. Apply advanced quantitative and qualitative research techniques and tools.
3. Design research studies using appropriate sampling strategies and data collection methods.
4. Analyze and interpret research data using advanced statistical and qualitative analysis techniques.
5. Communicate research findings effectively in written and oral formats.
6. Evaluate the validity, reliability, and generalizability of research findings.
7. Integrate and synthesize findings from multiple data sources.

Contents:

Theory Testing and Theory building approaches

- Process of theory building
- Process of theory testing

Research Design

- Components of Research Design
- Types of Research Design
- Quantitative/Positivist approaches
- Experimental Research, non-experimental research
- Qualitative/Interpretivist Methods
- Phenomenology, ethnomethodology, Case research method, ethnography, grounded theory, action research

Methods and techniques of data collection

- Questionnaire, survey, interview survey, Focus group discussion, Interviews (structured, semi structured and unstructured)

Sampling design

- Unit of analysis, population, sampling frame, sample size, Sampling error
- Types of sampling techniques: Probability and non-probability sampling techniques

Ensuring quality of research

- Objectivity
- Validity and its types
- Reliability and its types
- Measurement and its types

Data Analysis

- Descriptive analysis, Inferential analysis, content analysis, discourse analysis, thematic analysis, meta-analysis

Report Writing

Literature Citing and Bibliography

- Footnotes and Endnotes

2. Neuman William Lawrence. (2011) Social Research Methods 7th edition. Allyn and Eacon., Boston.
3. Juliet Corbin and Anselm C Strauss, Basics of Qualitative Research (Third Edition) (2008) Sage Publications New Delhi

Suggested Books:

1. Bridget Somekh & Culhy. 2005. Research Methods in the Social Science. New Delhi: Vistaar Publisher.
2. Norman Blaikie, 2003, Analyzing Quantitative Data, Sage Publication London.

Course Description:

The course "Social Statistics II" builds upon the foundational knowledge of social statistics and aims to further develop students' understanding and proficiency in advanced statistical techniques for analyzing social data. Through a combination of theoretical concepts, practical applications, and data analysis exercises, students will explore advanced statistical methods commonly used in social sciences. The course emphasizes the application of statistical techniques to address complex research questions and draw meaningful conclusions from social data. Students will gain the skills necessary to conduct sophisticated statistical analyses and interpret results in a social science context.

Learning Objectives:

By the end of this course, students will be able to:

1. Understand and critically evaluate advanced statistical techniques used in social research.
2. Apply advanced statistical methods to analyze social data and address complex research questions.
3. Select appropriate statistical techniques based on the characteristics of the data and research objectives.
4. Interpret and communicate statistical results effectively in a social science context.
5. Identify and address common challenges and limitations in the analysis of social data and evaluate the validity, reliability, and generalizability of statistical findings in social research.
6. Utilize statistical software to conduct advanced data analysis.
7. Apply advanced statistical techniques to conduct independent research projects in social sciences.

Course Outline:**I Introduction**

- Elementary mathematical concepts and notions
- Meaning and Definition of Social Statistics
- Use of Statistics in Modern Sociology
- Grouped and Un-grouped Data
- Statistics: Descriptive and Inductive
- Measurement: Nominal, Ordinal and Interval scales
- Frequency Distribution: Tabular Organization and Graphic Presentation of Data

II Measures of Centrality and Location

- Mean, Median and Mode
- Percentiles, Deciles and Quartiles

III Measures of Dispersion

- Range
- Mean Deviation
- Standard Deviation
- Variance
- Quartile Deviation

IV The Normal Distribution

- Form of the normal Curve
- Area under the Normal Curve

V Probability

- Basic concepts
- Rules of Probability
- Binomial Probabilities

VI Non Parametric Tests

- Chi Square Test
- Other Non-parametric Tests: The Sign Test, The Median Test, The Mann Whitney Test

VII Computer Application: Introduction to SPSS

Recommended Books:

1. Blalock Hubert. M. (1972). Social Statistics. Tokoyo: McGraw-Hill.
2. Boniface, David R. (1995). Experiment Design and Statistical Methods. For Behavioral and Social Research. London: Chapman & Hall

4. Edward, Allen L. (1960). Statistical Methods for Behavioral Science. New York: Rinehart and Company, Inc.
5. Elifson, Kirk W. (1990). Fundamentals of Social Statistics. New York: McGraw Hill Book Co.
6. Hagood, Margaret Jarman and Daniel O. Price. (1952). Statistics for Sociologists. New York: Holt, Rinehart and Winston.

Course Description:

This course explores the theories, processes, and strategies of social change in various societal contexts. It examines the dynamics of social transformation, the role of social movements, and the factors that contribute to positive change. Through a multidisciplinary approach, students will engage with theoretical frameworks, case studies, and practical examples to gain a comprehensive understanding of social change dynamics and develop skills for promoting and facilitating social change.

Learning Outcomes:

By the end of the course, students will be able to:

1. Understand the theories and models that explain social change processes and dynamics.
2. Identify and analyze the key factors that contribute to social change in various contexts.
3. Critically evaluate the role of individuals, communities, and social movements in promoting social change.
4. Recognize the impact of power dynamics, social inequality, and structural factors on social change efforts.
5. Identify and apply effective strategies and tactics for driving social change.
6. Analyze the ethical considerations and challenges associated with social change initiatives.
7. Evaluate and measure the effectiveness and impact of social change efforts.
8. Understand the global dimensions of social change and the role of transnational networks.

Contents:**Introduction to Social Change**

- Defining social change in contemporary society
- Factors affecting social change
- Determinants of social change
- Examining different theoretical perspectives on social change.

Theories and Models of Social Change

- Classical School of thought
- Neo-Classical School of thought
- Modern/contemporary school of thought

Process of Social Change

- Exploring the role of individuals, communities, and organizations as agents of social change.
- Examining the characteristics and strategies of social movements and their impact on societal transformation.

Structural Factors and Social Change

- Analyzing the role of structural factors, including politics, economics, and institutions, in shaping social change.
- Understanding the impact of globalization, technology, and social media on social change dynamics.

- Examining the interplay between structural change and individual agency.

Power, Inequality, and Social Change

- Investigating the role of power dynamics, social inequality, and social justice in processes of social change.
- Understanding how social movements challenge and transform power structures and promote social equality.
- Analyzing the impacts of social change on marginalized and disadvantaged groups.

Complexities and resistance to social change

- Social Change in Knowledge society
- Technological Advancement in the modern world
- Problems of developing and underdeveloped world
- Resistance factors in the process of social and cultural Change

Course Description:

Theories seek to explain things. And thus, sociological theory attempts to explain how the social world operates. This social world consists of the behaviors, interactions, and patterns of social organization among humans. This course provides a review of contemporary and modern sociological theories. It focuses on the content and utility of theories in terms of understanding social world. While the course provides a general history of sociological theory, the focus remains on examining how contemporary theories provide the basis for a better understanding of the character and dynamics of societies around the world. The contents of the course also help understand the nature of sociological theories. The student will be able to reflect upon the contemporary social issues in the perspective of Sociological imagination. This course will enable students to Identify, compare and critically assess the theoretical approach and substantive analyses and implications of the work of key sociological theorists in this period.

Contents:

- 1 Rational Choice / Social Exchange Theory
- 2 Skinner and Behaviorism, G.C. Homans, Peter M. Blau
- 3 Social Behaviorism and Interactionism: Phenomenology, Alfred Schutz,
- 4 Systemic Social Behaviorism, Max Weber, George Simmel,
- 5 Symbolic Intertactionism, C.H. Cooley and G.H. Mead
- 6 Ethnomethodology: Introduction, H. Garfinkal
- 7 Theory of Michael Foucault
- 8 Evolving Contemporary Feminist Theory: Feminism, Theories of Gender Disparity
- 9 Recent Developments: Integration and Synthesis: Micro-Macro Integration
- 10 Agency-Structure Integration, And Synthesis in Sociological Theory

Recommended Texts:

Course Description:

This course examines key ideas, theories, and actors (institutions, social movements, NGOs, governments, etc.) that have shaped mainstream and alternative development processes and practices. The course historicizes 'development,' looking at the ways in which its discursive and political economic aspects mutually reinforce power structures that determine which peoples do and do not count as 'developed' and which perspectives on change become part of development practice. The first part of the course covers the foundations of the capitalist world-system in colonial histories and the ways such history influenced the ideas and issues shaping 'development' in the twentieth and early twenty-first century. The second part of the course covers ideologies, institutions, and processes that led to a capitalist globalization shaped by neoliberalism. It also examines the effects of these processes on particular spheres such as gender, the food system, NGOs, and Trade/Fair Trade. The final part of the course covers in depth several key areas in which capitalist development has created a social 'crisis'—factory labor, peasants and land issues, finance and debt, and alternative forms of state governance.

Contents:

- 1 Introduction: Theories of Development, The modernization school, Marxist and socialist models, Measures of Development, Patterns of Global stratification
- 2 Development and underdevelopment-dependency
- 3 Developmentalism – basic needs
- 4 Structural adjustment
- 5 Social Change and Development in Global Perspective
- 6 The politics of development: Economy, policy
- 7 Culture-ideology,
- 8 Corporations, classes and consumerism
- 9 Gender and development,
- 10 Transnational practices in the third world
- 11 Socialist societies in the global system
- 12 Community Participation
- 13 Evolution and development of concept
- 14 The Role of Aid in Development
- 15 The Role of Non-Governmental Organizations in Development
- 16 The Role of Technology in Development
- 17 Development of Pakistan: A Case Study

Recommended Texts:

- 1 Hooks, G. (2016). *The sociology of development handbook* (1sted.). California: University of California Press.
- 2 Singh, S. (2010). *Sociology of development* US: Rawat Publications.

Suggested Readings:

- 1 Andrew, W. (1997). *Introduction to the sociology of development*. New York: Palgrave.
- 2 David, B. (1994). *Re-thinking social development: Theory, research and practice*. England: Longman Scientific & Technical.
- 3 Harrison, D (2005). *The sociology of modernization and development*, UK: Routledge.

Course Description:

This course offers an introduction to how sociological approaches to health, health care and medicine have offered critical perspectives on understanding illness and suffering from subjective and structural perspectives. There is an emphasis on understanding and comparing theoretical models of health, illness and healthcare so as to be able to make a critical assessment of research. These theoretical approaches are emphasized for qualitative and quantitative approaches alike, and explore different forms of research (evaluation research, primary and secondary analysis, comparative research). In addition to a range of theoretical approaches, different applications are covered, to show theories such as embodiment are applicable across cultural and social settings. Critique of substantive research from theoretical perspectives and of theoretical formulations and of their application to empirical material will be encouraged by means of the assessment strategy. This course will also provide knowledge to the students regarding the health care systems and discuss their functions and structures. This course also aims to impart knowledge in the students regarding the different health models and health care providers.

Contents:

- 1 Medical Sociology, Defining Health, Contrasting ideas about Health and Social Behavior
- 2 Imagining Health Problems as Social Issues, Social Production and Social Construction of Health
- 3 Deconstructing Health and Illness, Major Sociological paradigm SOC and health
- 4 Indigenous and Cosmopolitan Models of Health Care, Health Care: The Indigenous Version
- 5 Social Roles of Care Seekers and Care Providers
- 6 Cultural Construction of Health and Illness, Indigenous Health System and Health Beliefs
- 7 Role of Indigenous Healer, Role of Cosmopolitan Doctor
- 8 Epidemiology, Epidemiological Measures, The Development of Epidemiology
- 9 The Complexity of Modern Ills: Coronary Heart Disease, Disease and Modernization
- 10 Models of Health, Medical Model, Bio-Psycho-Social Model, Human ecosystem Model
- 11 Social Stress, Symbolic Interaction: Cooley, Thomas, and Goffman
- 12 Functionalism: Durkheim, Stress, Social Factors and Stress
- 13 The Body, Medicine, and Society: Beliefs about Health and the Body, Medical Encounter
- 14 The Sick Role: Illness as Deviance, Functionalist Approach to Deviance, The Sick Role
- 15 Sickness as Social Deviance, Being Sick and Disabled
- 16 Doctor-Patient Interaction: Models of Interaction, Misunderstandings in Communication
- 17 Patient Compliance, The Future of Doctor-Patient Relations, Doctor-Patient Relations
- 18 Hospitals: The Development of the Hospital as a Social Institution Hospitals in the United States
- 19 The Hospital-Patient Role, The Rising Cost of Hospitalization

Recommended Texts:

- 1 White, K. (2017). *An introduction to the sociology of health and illness* (3rded.). US: SAGE Publications Ltd.
- 2 Annandale, E. (2014). *The sociology of health and medicine: A critical introduction* (2nded.). USA: Polity Press.

Suggested Readings:

- 1 Cockerham, W. (2011). *Medical sociology* (12thed.). US: Prentice Hall.
- 2 Clarke, A. (2010). *The sociology of healthcare* (2nded.). UK: Routledge.
- 3 Sujatha, V. (2014). *Sociology of health and medicine: New perspectives* (1sted.). UK: Oxford University Press

Course Description:

This course explores significant social problems in contemporary society, examines the process of how these social problems arise in society, and considers possible solutions. As an introduction to this topic, the course will focus on understanding how and why social problems develop and the controversies that accompany them. In order to undertake this task, the course will be organized into three main units. 1) The first unit of the course will consider different theoretical perspectives as well as social science research methods used to identify and understand social problems. We will use these theories and research methods to develop a deeper insight on the topics to be covered in units 2 and 3 of the course. 2) The second unit of the course will examine specific social problems associated with well being, and the social inequality issues that surround them. 3) The third unit of the course will discuss institutional and organizational policies that develop as a result of social problems and the outcomes of those social policy approaches.

Contents:

- 1 Introduction: Definition and Nature of Social Problem, Approaches to Social Problems
- 2 Characteristics of Social Problems, Classification of Social Problems
- 3 Role of Sociologists in solving Social Problems
- 4 Population Problems, High Population growth: Causes and consequences, Over population
- 5 Economic and Agricultural Problems, Industrialization, Agricultural credit
- 6 Unemployment and underemployment
- 7 Drug and narcotic addiction: Drug addiction-factors causing its spread
- 8 Socio-economic psychological and other affects on individual and the family
- 9 Remedial measures, Narcotics measures of control in Pakistani society
- 10 Problems of health and environment, Mental health
- 11 Physical health and sanitation
- 12 Environmental problems
- 13 Orientation to culture of Pakistan: Value conflict in a changing society
- 14 National unity and integration, Problems of national character
- 15 Major Social Problems in Pakistan
- 16 Beggary, Child labor/ abuse
- 17 Bonded labor, Bad governance
- 18 Gender discrimination, Illiteracy
- 19 Family violence

Recommended Texts:

- 1 Joshi, S. C. (2005). *Social problems: Genesis, causes and magnitude*. India: Akansha Publishing.
- 2 Ahmed, A. S. (1990). *The social sciences perspective*. Karachi: Oxford University Press.

Suggested Readings:

- 1 Korson, H. J. (1974). *Contemporary problems in Pakistan* Netherlands: Brill.
- 2 Birkhead, S. G. (1966). *Administrative problems in Pakistan*. New York: Syracuse University Press.

Course Description:

The course "Sociology of Religion" explores the sociological perspectives and theories applied to the study of religion and its role in society. Students will examine the social, cultural, and structural aspects of religion, including its influence on individuals, communities, and institutions. Through a critical examination of religious beliefs, practices, and rituals, students will gain insights into the intersection of religion with social phenomena such as socialization, identity, power, inequality, and social change. The course aims to deepen understanding of the complex relationship between religion and society and the ways in which religion shapes and is shaped by social structures.

Learning Objectives:

By the end of this course, students will be able to:

1. Understand the sociological theories and concepts used to study religion.
2. Examine the influence of religion on individuals' beliefs, attitudes, and behaviors.
3. Critically evaluate the role of religion in shaping social identity, socialization, and community formation and explore the intersections of religion with power, inequality, and social stratification.
4. Investigate the relationship between religion and social change, including religious movements and secularization.
5. Analyze the impact of religion on social institutions such as education, politics, and family.
6. Understand the diversity of religious beliefs and practices across different societies and cultures.

Course Outline:

1. **Introduction**
 - Definition of Religion
 - Elements of Religion.
2. **Theories of Religion**
 - Sociological theories of religion
 - Psycho-analytical theory of religion
 - Evolutionary Sociological approaches
3. **The Sociological Functions of Religion**
 - Universal Order of Religion
 - Pragmatism in Religion
 - Integrating Power of Religion, and Religion and Social Ideals.
4. **Sociological Analysis of major world religions: Islam Judaism, Hinduism, Christianity, Confucianism and Buddhism.**
 - Religion as Agency of Social Control.
 - Sociology of Islam:
5. **The world view of Islam**
 - Human Nature and Human Personality

- Prophet's Sunnah as the Normative matrix of Islamic culture and Society
- Normative Foundation of Islamic Social Structure of Society
- Major Components of Social Structure
- Groups and Institutions in Islamic Society
- Institution of family and its place in the Islamic Social Scheme, socialization in Islamic Framework, persuasion and Motivation and their relation to Socialization Development of Attitudes.

6. Education as the mean of Socialization status of Ulama in the Muslim Society epilogue.

Recommended Books:

1. Binder, Leonard (1963). *Religion and Politics in Pakistan*. California: University of California Press.
2. Evan, Prithard E.F. (1965). *Theories of Primitive Religions*. Oxford: Claneolan Press.

Course Description:

The concept of community development concerns ways of thinking about and resolving community problems. Students examine the relationship between individual and community issues. In addition, they have opportunities to develop organizing skills on an agency and community level. Students explore possible interventions along a continuum: from changes in human service work practice and under agency auspices to broader structural change within the community. This course will provide knowledge regarding the different methodologies of community organization and its related services. This course also provides brief knowledge regarding the development in Pakistan through community organization. Through interactive lectures, graded online discussions, seminar and presentations, students acquire information through which community work can be examined while analyzing outreach and development issues and activities. This course also has a practical part so it will enable students to acquiring hands on experience of it because community development is a profession which needs both theoretical and practical knowledge.

Learning Outcomes:

1. Understand the principles, theories, and models of community development.
2. Analyze the social, cultural, economic, and environmental factors that influence community development processes.
3. Apply community development approaches to address specific community needs and challenges.
4. Demonstrate knowledge of community engagement strategies and effective methods for community participation and Identify and mobilize community resources and assets for sustainable development.
5. Assess and address power dynamics and social inequalities within communities and evaluate the impact of community development interventions and programs.
6. Develop skills in collaborative decision-making, negotiation, and conflict resolution within community contexts to foster community empowerment and capacity-building through inclusive and participatory practices.
7. Reflect critically on ethical considerations and social justice principles in community development work.

Course Outline:**1. Introduction**

- Meaning, Scope and Subject Matter
- Historical Development

2. Theories and Approaches of Community Development**3. Processes of Community Development**

- Community Mobilization
- Community Participation
- Resource Mobilization.

4. Community Developments

- Community Development Programs in Pakistan
- History of Community Development before Partition of the Sub-continent
- Community Development with Reference to Village-AID Program.

5. Role of International Organizations in Participatory Community Development

6. Community Concepts and Definition

- The Nature of Community
- Methodology and Organization of Community
- Development and Role of Social Welfare Councils in Community Development.

7. Community Organization and Related Services

- Family and Child Welfare
- Cottage Industries
- Adult Education,
- Skill Development and Health
- Housing
- Water and Sanitation
- Development in Rural/Urban Areas of Pakistan.

8. Cooperation and Community Development

- Principles and Methods of Cooperation
- History of Cooperative Movement in Pakistan
- Role of Cooperative Societies in Community Development.

9. Community Development Programs in Underdeveloped Countries of Asia and Africa

- India, Pakistan, Bangladesh, Kenya, Thailand, Egypt and Philippines.

Field visits and Presentation of Report

Note:

Field visits of students shall focus on visiting community development projects in rural and urban areas. These projects may be both government and non-government organizations (NGOs). The students shall be required to submit field reports, which will be assessed as equivalent to 20 marks of the assignment by the teacher Incharge.

Course Description:

The course "Sociology of Globalization" examines the social, cultural, economic and political dimensions of globalization and its impact on societies around the world. Students will explore the processes, causes, and consequences of globalization from a sociological perspective. The course will analyze the interconnectedness of societies, the transformation of social relations, and the challenges and opportunities posed by globalization. Topics covered include global inequality, cultural globalization, migration, transnational social movements, and global governance. Through critical analysis, students will develop a nuanced understanding of the complex and dynamic nature of globalization and its implications for individuals, communities, and societies.

By the end of this course, students will be able to:

1. Understand the processes of globalization in sociological context, analyzing the social, cultural, economic, and political factors driving globalization processes.
2. Examine the impact of globalization on societies, economies, and cultures and evaluate the social consequences of global inequalities and patterns of global integration.
3. Understand the dynamics of transnational social practices and their role in shaping global change as well as the complexities of migration and its relationship to globalization.
4. Critically assess the influence of global governance structures and organizations to explore the cultural dimensions of globalization and its impact on local and global identities.
5. Analyze the role of media and technology in shaping global interconnectedness which enables them to apply sociological perspectives to analyze real-world global issues and propose strategies for positive social change.

Contents:

1. **Introduction and Overview of Sociology of Globalization**
 - History of Globalization
 - Globalization: Myth or Reality
 - Factors expediting globalization process
 - Defining globalization and its significance in sociology
 - Overview of key concepts related to sociology of globalization
 - Understanding global stratification
2. **Global Flows**
 - Flow of finance, flow of people, flow of goods and services, Flow of ideas
 - Transnationalism vs globalization
 - Critiques and alternative perspectives on globalization
3. **Dimensions of Globalization**
 - Economic Globalization
 - Political globalization
 - Social, Cultural globalization

4. **Economic Globalization**

- Introduction, Free market, Economic liberalization, across border Expansion of Capitalism,
- Major theoretical frameworks explaining Economic globalization
- Modernization theory, Dependency theory, World system Theory, Theory of imperialism
- Role of Multi-National corporations in social Cultural and Economic spheres of societies
- Pros and cons of operations of MNCs
- Critique of Economic Globalization, Increasing Economic inequalities

5. **Political Globalization**

- Introduction, History, Transnationalism, Political globalization
- Decline of national sovereignty
- Analyzing political globalization and global governance mechanisms, Power and transnational politics
- The concept of the transnational state and its implications for politics
- Role Global governing Institutions UNO, International Court of Justice etc., Demise of nation state

6. **Cultural Globalization**

- Cultural implications of global cultural flows,
- Oneness of culture, Homogeneity of culture,
- Heterogeneity of culture,
- MacDonalization, Institutionalization, Coca colonization, Westernization,
- Global media and cultural Flows
- Glocalization, cultural contestation, Resistance of global culture

7. **Globalization and Development**

- Globalization and development of Third world countries,
- Global inequalities, Pros and cons of Global economic processes
- Analyzing the emergence and influence of neo-liberalism in the era of globalization
- The impact of neo-liberal policies on societies and economies
- Exploring the relationship between globalization and corporations
- Corporate governance, strategies, and the rise of multinational corporations

8. **Global Issues and Coping Strategies**

- Transnational crime, Terrorism, Pandemics
- Nature of Transnational crime and dealing mechanisms, Global policing,
- Pandemics, factors and solutions, Global health institutions

9. **Future of Globalization**

- Strategies of states to counter bad impacts of Globalization
- Regionalization, Regional blocs, BRICS, SAARC, ASEAN, NATO, SCO

Recommended Texts:

1. Smith, L. K. (2012). Sociology of globalization: Cultures, economies, and politics (1sted.). US: Westview Press
2. Martell, L. (2010). The sociology of globalization (1sted.). USA: Polity Press

Suggested Readings:

1. Thomas, J. (2005). *The handbook of political sociology: States, civil societies, and globalization*, Cambridge: University Press
2. Robertson, R. and White, E. K. (2003). *Globalization: Critical concepts in sociology*, UK: Routledge

Course Description:

The course "Sociology of Peace and Conflict" explores the social dynamics, causes, consequences, and resolution of conflicts at various levels, ranging from interpersonal to global conflicts. Drawing on sociological theories and perspectives, students will examine the social, cultural, economic, and political factors that contribute to the emergence and persistence of conflicts, as well as the conditions and processes that foster peace and conflict resolution. The course will explore topics such as violence, social inequality, identity, power, peace movements, and peace building strategies. Students will develop a sociological understanding of peace and conflict and explore ways to promote peaceful coexistence and social justice.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the sociological theories and concepts related to peace and conflict for the analysis of social, cultural, economic, and political factors that contribute to the emergence and escalation of conflicts.
2. Examine the dynamics of violence, aggression, and social inequality in the context of conflict and evaluate the impact of conflicts on individuals, communities, and societies.
3. Critically assess the role of identity, ethnicity, religion, and nationalism in conflicts and explore the mechanisms and processes of conflict resolution and peace building.
4. Analyze the role of social movements and activism in promoting peace and social justice.
5. Understand the complexities of peace building and the challenges faced in post-conflict societies to engage in critical discussions on the ethics and dilemmas of peace and conflict interventions.
6. Apply sociological theories and concepts to analyze real-world peace and conflict issues and propose strategies for positive social change.

Contents:

1. **General Overviews**
 - Sociology of Peace and War,
 - Introduction to Peace and Conflict
 - Studies, War and Possibilities of Peace
2. **War and Violence**
 - Explaining War and Violence,
 - Cultures of Violence, Sociology of Violence and Nonviolence,
 - religious traditions violence and non-violence
3. **Social Problems**
 - Aggression, Psychology of Aggression,
 - Social Conflict and War,
 - Forms and Causes of Conflict;
 - Variations Among Social Conflicts
4. **Conflict and Conflict Management**
 - Conflict management and resolution,
 - Conflict theory

5. **Military Sociology: Militarism**
 - Military Institutions and war,
 - The Military and Society,
 - War and the Military, Civil-Military Relations,
 - Militarism and Development in Underdeveloped Societies,
 - History of Revolutionary Warfare,
 - The Case of the Pakistani Military,
6. **Sociology of Terrorism and Genocide**
 - Perspectives on the Holocaust and Genocide,
 - Inequality and Conflict,
 - Gender and Conflict (Violence Against Women)
7. **Building Cultures of Peace in Pakistani Society**
 - Race,
 - Class and Gender,
 - Nonviolence and Popular Movements,
 - Nonviolence and the Ethics of Social Action,
 - Nonviolent Strategies and Conflict Transformation
8. **Peace Rhetoric**
 - Peace,
 - Peace Building,
 - Peace enforcement,
 - peace keeping,
9. **Nonviolence in Literature and Media, Peacemakers**
 - Nobel Peace Laureates and Social Action,
 - Reconciliation vs. Revenge
 - Transitional Justice;

Recommended Books:

Course Description:

The course "Qualitative Research" provides students with a comprehensive understanding of qualitative research methodologies and their applications in social science research. Students will explore various qualitative research methods, data collection techniques, and analysis approaches. The course emphasizes the theoretical underpinnings of qualitative research, ethical considerations, and the practical skills needed to conduct and analyze qualitative data. Through hands-on activities and real-world examples, students will develop the knowledge and skills necessary to design, implement, and report qualitative research studies.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the foundational principles, theories, and epistemologies of qualitative research.
2. Identify and select appropriate qualitative research methods for different research questions and demonstrate proficiency in qualitative data collection techniques, such as interviews, focus groups, and observations.
3. Develop skills in conducting effective qualitative research design and sampling and apply rigorous data analysis methods for qualitative data, such as thematic analysis, content analysis, and grounded theory.
4. Evaluate the credibility, trustworthiness, and validity of qualitative research findings and demonstrate ethical considerations in qualitative research, including informed consent and confidentiality.
5. Effectively interpret and report qualitative research findings and understand the strengths and limitations of qualitative research compared to quantitative approaches.
6. Apply qualitative research methods to address real-world social science research questions.

Contents:**Introduction to Qualitative Research**

- The nature of qualitative research and its role in social science inquiry
- Philosophical foundations and epistemologies of qualitative research

Qualitative Research Design

- Research questions and objectives in qualitative research
- Measurement of constructs
- Tools of Data Collection
- Validity and reliability
- Sampling strategies and sample size considerations

Methods of Qualitative Research

- In-depth interviews and semi-structured interviews
- Focus groups and group discussions
- Ethnographic observations and participant observation
- Case research

- Phenomenology
- Ethnomethodology
- Grounded theory

Qualitative Data Analysis: Approaches and Techniques

- Thematic analysis and coding techniques
- Content analysis and narrative analysis
- Grounded theory and interpretive phenomenological analysis

Ethical Considerations in Qualitative Research

- Informed consent, confidentiality, and participant protection
- Ethical dilemmas and strategies for resolving them

Ensuring Rigor and Trustworthiness in Qualitative Research

- Credibility, transferability, dependability, and confirmability
- Strategies for enhancing the trustworthiness of qualitative research findings

Interpretation and Reporting of Qualitative Research

- Analyzing and interpreting qualitative data
- Writing qualitative research reports and presenting findings

Recommended Texts:

- 2 Denzin, K. N. and Lincoln, Y. (2008). *Collecting and interpreting qualitative materials*, New Delhi: Sage Publications.
- 3 Flick, U. (2008). *Designing qualitative research*. New Delhi: Sage Publications.
- 4 Corbin, J. and Strauss, C. A. (2008). *Basics of qualitative research* (3rded) New Delhi: Sage Publications.

Course Description:

Internship is on-the-job training for many professional jobs, similar to an apprenticeship, more often taken up by university students during his undergraduate or master degree in their free time to supplement their formal education and expose them to the world of work. The internship program is designed to provide students engaged in a field experience with an opportunity to share their insights, to explore the links between students' academic preparation and their field work, and to assist participants in developing and carrying out the major research project which will serve to culminate their internship experience. Internships are individualized and tailored to the needs and interests of each student in the program. As part of the internship experience, students are expected to take an active role in finding an appropriate internship for themselves.

Course Description:

The course "Quantitative Data Analysis for Social Sciences" provides students with the knowledge and skills to analyze and interpret quantitative data in social science research. Students will learn various statistical techniques and methods commonly used in social science research to analyze numerical data. The course emphasizes hands-on application of statistical software and critical interpretation of statistical findings. Through practical exercises and real-world examples, students will gain proficiency in conducting quantitative data analysis and understand its relevance for informing social science research and policymaking.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the fundamental principles and concepts of quantitative data analysis in the social sciences and apply appropriate statistical techniques to analyze and interpret social science data.
2. Demonstrate proficiency in using statistical software for data analysis and evaluate the strengths and limitations of different statistical methods.
3. Interpret and critically evaluate statistical findings in social science research and design and conduct quantitative research studies using appropriate data analysis techniques.
4. Develop skills in data management and data cleaning for quantitative analysis and communicate statistical results effectively to both technical and non-technical audiences.
5. Apply quantitative analysis to address real-world social science research questions.

Course Content:**Introduction to Quantitative Data Analysis**

- Overview of quantitative research methods in social sciences
- Introduction to statistical software and data management

Descriptive Statistics

- Measures of central tendency and variability
- Frequency distributions and graphical representations

Inferential Statistics

- Hypothesis testing and statistical significance
- Confidence intervals and effect size

Bivariate Analysis

- Correlation and association between variables
- T-tests and chi-square tests

Multivariate Analysis

- Regression analysis and linear models
- Logistic regression for categorical outcomes

Data Visualization

- Graphical representation of quantitative data

- Effective communication of statistical findings

Survey Research and Questionnaire Design

- Principles of survey research design
- Techniques for questionnaire construction and validation

Data Cleaning and Preparation

- Identifying and handling missing data
- Data transformation and recoding

Data Analysis for Comparative Studies

- Cross-tabulation and comparative analysis
- Analysis of variance (ANOVA) for group comparisons

Advanced Topics in Quantitative Analysis

- Factor analysis and dimensionality reduction
- Structural equation modeling for complex relationships

Ethical Considerations in Quantitative Analysis

- Research ethics and data privacy
- Avoiding biases and ensuring data integrity

Application of software for Quantitative Analysis in Social Science Research

- Applying quantitative analysis techniques to real-world social science research questions
- Critical evaluation and interpretation of quantitative findings

Capstone Project

3 (3+0)

The thesis is a key component of the BS program. During their final year of study, BS students write a thesis and present it before their peers and faculty in a department seminar. Because this degree is the prerequisite for graduate work in sociology, and because it is our highest degree, we expect the thesis to be of substance. To prepare thesis, students will work with an advisor to define an area of special investigation where you can demonstrate your ability to think sociologically. The thesis provides an opportunity for the students to explore in greater depth some aspect of sociology that particularly interests of students.

*LIST OF
OPTIONAL COURSES*

Course Description:

Industrial Sociology is concerned with industry (or any form of work organization) as a social system, including those factors (technical, emotional, political) which affect the structure, the function and the changes in that system. This course of Industrial sociology concerns itself with two basic characteristics of industry and the workplace. It examines the production of goods and services in society, and specifically the nature of the social relations involved in the production process. These social relations may be of a harmonious nature, or they may create conditions of conflict. The second element is the analysis of the tasks that individuals perform in the workplace to see if these tasks provide for the satisfaction of human needs. Understanding the industrial arena from the sociological concept is a major advantage for anyone interested in the workforce. This course also provide insight of industrialization in Pakistan and try to develop an understanding of problems and prospects of industrialization through sociological perspectives.

Course Contents:**1. Introduction:**

- Industry and Society
- Industry and Social Stratification
- Work, Occupation, Industry, Organization, Factory and Management

2. Industrialization:

- Social Theory of Productive System
- Antecedent of Industrialization in west
-

3. Theories of Industrialization**4. Formal Organization:**

- Bureaucracy
- Organizational Charts (Structure)
- Trade Union, and theories of Unionism

5. Work ethics in Islam

- Division of Labor
- Work ethics
- Distribution of Wealth

6. Industrialization in Pakistan

- Historical view of Industrial Development
- Problems and Prospects of Industrialization in Sociological Perspective
- Industrial Relationship in Pakistan

7. Trade Unionism in Pakistan

- Labor Movement
- Trade Unionism
- Union Leadership and Collective Bargaining

8. Laboure Policies in Pakistan

- Historical Perspective and social change
- Analysis of wages

Field Visit:

The students will visit different industries to study human relations in industry. They will meet the employer and employees to discuss their problems and submit a comprehensive report.

Suggested Readings:

Course Description:

This course is designed for BS Sociology or undergraduate students. The course is set up to enable the students to gain educational skills towards understanding the social influences on the educational system. It exposes the students to the idea of education as a social phenomenon and leads the students to the concept of society, sociology, sociology of education, socialization, social institutions, sociological theories, role of education in society, cultural context of educational system, issues of education and social stratification, social criticism of trends in modern education and Educational Innovation and reforms. The course also explores the relationship between education and development as well as the critical issues surrounding their relationship. Students will learn fundamental principles and theories from the sociology of education perspective that will help them analyze, understand and formulate responses to different situations, problems and dilemmas present in education system. Our pursuit of this goal will have students bridging together theory and various forms of evidence (such as empirical research, policies, practices and events in the world of education), and responding from this basis.

Course Outline:**1. Introduction**

- The Concept of Education
- Origin and Development of Education
- Forms of Education, Formal, Non-formal
- Contemporary Education System

2. Sociological Theory and Education

- Education and Socialization
- Social Stratification and Education
-

3. Roles of Education

- Education and Social Mobility
- Functions of Education
- Education and Democracy
- Education for Leadership

Course Description:

The aim of the course is to increase the understanding of both traditional and modern perspectives on the military use of force. The course combines theoretical and applied elements on the use of force. The main theme of the course is how, for what ends and under what circumstances military power can be useful to achieve political goals. It provides an overview over the history of military theory and contains rationalistic as well as constructivist approaches to the study of the use of military force. Throughout the course the use of force is problematized through different ethical perspectives. The major learning objectives are comprised of factual knowledge of the development of the historical faces of war and the normative theories of war stemming from philosophy, ethics and theology. The students are supposed to develop the adequate skills of normative analysis of war to be able to take part in the practical discourse on war and to provide philosophical analysis of the ongoing conflict, war or some other outbreak of substantial violence.

Contents:

- 1 Introduction
- 2 What is war?
- 3 How was the life of the nation-state connected with changes in warfare?
- 4 Role of military
- 5 Importance of sociology in military
- 6 Genocide and War
- 7 The gendering of war
- 8 Late militarism
- 9 Mediated war. Civil war
- 10 Revolution and war
- 11 State crisis and formation
- 12 Global era 'new' wars
- 13 Ethnicity and political economy
- 14 Ethnic 'cleansing' and genocide gender and refugees
- 15 Humanitarian
- 16 Intervention Ncfos
- 17 Media and global justice
- 18 The future of war

Course Description:

The Rural Sociology focuses on environmental well-being, sustainable development of natural resources, social and community quality of life, and diffusion and impacts of technologies. The course provides expertise for students to focus on agriculture and the environment or social change and development. Since Pakistan and the rest of the world lives in a largely rural environment, the issues affecting the country are therefore affecting mainly rural population. Issues affecting food security, population, poverty, social change and many others can be tackled by tackling rural problems hence it is important for the society to review the rural populace to help the rest of its population. This course is intended to better acquaint you with rural society through the study of rural sociology. A central premise is that a better understanding and appreciation of the Nation's rural roots and of ongoing changes in rural Pakistan will facilitate a more rounded perspective on the problems and opportunities facing the nation as a whole.

Course Contents:**1. Introduction to Rural Sociology**

- Rural Sociology as a Science
- Rural Sociology and Other Social Sciences.

2. Basic Concepts and Processes

- An understanding of the Rural Social System
- Caste and "baradari" structure
- Fractions, dispute and "We-groups".

3. Problems of Small and Fragmented Holding

- Landless tenants and agricultural labor.

4. Social Stratification and Social Differentiation

- Basic Concepts and action:
- Group, Role and Status, Norms and Values, Folkways and Mores
- Social Systems and Sub-systems
- Rural Culture, Social Processes in Rural Society,

5. Rural Social Institutions, Technology and Rural Society**6. Social Change and Rural Society**

- Rural Settlement
- Small scale farming
- Feudalism, Capitalism, Family farming
- Agrarian politics and village development

7. Relationship Between Technological and Socio-Economic Aspect of Rural Society.

- Gender and Development
- Role and status of Rural Woman
- Pattern of Rural Settlement

8. Rural Resources

- Land Tenure System, size of landholdings.
- Rural Social structure, provision of services in rural area; health, education and sanitation etc.

Course Description:

This course reflects the major contemporary trends in corporate citizenship, social and environmental responsibility and accountability. Communities and governments now require organizations to be responsible and accountable for their performance in relation to their social and environmental responsibilities, and these responsibilities have increasingly formed part of organizations' ethical values and strategic agendas. This course will include consideration of the enlarged spectrum of corporate stakeholders; corporate social responsibilities, citizenship and reputation; business-government relationships and political environmental management; sustainable development; environmental management and accountability; social investing and corporate philanthropy; community and employee relationships; and public affairs and media management. Accordingly, this course focuses on understanding and implementing enhanced organizational performance that includes social, environmental and ethical performance indicators in addition to the traditional financial performance indicators.

Course Outlines:**1 Why Should We Care?**

- Corporate Social Responsibility means
- The value proposition of Corporate Social Responsibility

2 What is CSR and Where are We Now?

- Definitions, capital market influences, rating organizations, recent studies
- CSR competencies
- Emerging guidelines

3 Who are the Stakeholders and What are Their Needs?

- Governments, non-governmental organizations (NGOs)
- The voiceless stakeholders
- Geo-political influences

4 What are the enablers?

- Corporate governance
- Enterprise risk management
- Guidance from many constituencies
- Linkage to internal audit standards

5 What is the Triple Bottom Line?

- Economic viability
- Environmental soundness
- Social responsibility

6 How are Organizations Approaching?

- Climate change challenges
- Environmental health and safety concerns
- Supply chain issues
- Social responsibilities

7 How do you manage the reporting and assurance issues?

- Reporting challenges, dos and don'ts
- Assurance emerging practices

8 What is the Appropriate Role for Internal Audit?

- Competencies required

Course Description:

This course addresses the institution of family in terms of the nature and functioning of family and the social context of family. It examines the diversity of families in the Pakistani and other societies, conceptualizing the institution of family through a variety of sociological perspectives and theories. Research is presented that illuminates the nature of family and the ways in which families are influenced by social context and social change, and, in turn, the ways in which changes in family composition, roles, and relations influence society and social change. The changing nature of family and the relationship between family, ethnicity, and class are important subjects of study. Related topics include dating, marriage, cohabitation, divorce, childbearing, parenting, child development, family violence, love, intimacy, sexuality and aging. The main objectives of this course are Critically assess research literature on family studies; Recognize, define, and understand theoretical and methodological approaches to studying diverse families from a sociological perspective; Identify problems and frame research questions related to the study of the family and Examine families sociologically from a cross-cultural perspective.

Contents:**1. Family Organization**

- Definition and types
- Formation, Patterns and functions, Descent and social form, Family as a social system
- Variations in family organization: the conjugal family, matrilineal and matrilocal, patriarchal, and matriarchal, exogamous and endogamous, nuclear, joint and extended families,
- The family and household economy, Forms of marriage

2. Gender Disparity

- Gender role and status/division of labour
- Gender based differential treatment

3. Family and Personality Development

- Family as an agency of socialization, Inheritance, Physical surroundings, norms and values,
- Psychological elements/factors
- Factors affecting personality development
- Early and present influence moulding personality of family members, Husband-wife, parent-child, and siblings' relationship
- Development of beliefs and attitudes, individual and family differences
- System of discipline, rewards and punishments, Values, norms, customs, traditions and rituals

4. The family in Different Cultures

- Pakistani
- Western
- Indian

5. Marriage

- Definition
- Forms and functions
- Marriage in agricultural and industrial societies
- Role of husband and wife expectations and obligations, Family law ordinance
- Theories of mate selection

6. **Problems of Family and Marriage**

- Family disorganization
- Mobility and family
- Delinquency and truancy
- Family Crisis: death, disease, accidents, unemployment, disability, divorce, and desertion

Course Description:

The Sociology of Media and Communication course explores the role of media and communication in society from a sociological perspective. It examines the social construction of media, the impact of media on individuals and society, and the interplay between media, power, and culture. The course critically analyzes media institutions, media representations, and the social dynamics of media production, distribution, and consumption.

Learning Outcomes:

Upon completing the course on the Sociology of Media and Communication, students should be able to:

1. Understand the sociological perspective on media and communication and analyze the social construction of media and its influence on society
2. Examine the role of media in shaping culture, identities, and social norms and understand media representations and their impacts on individuals and communities
3. Evaluate the social and political implications of media ownership and control to understand the dynamics of media production, distribution, and consumption in relation to power and inequality.
4. Examine the influence of new media technologies and platforms on social interactions and communities and understand the relationship between media and social movements, activism, and political participation.
5. Explore the role of media in shaping public opinion, social change, and social control and ethical considerations and challenges in media production and consumption.
6. Develop media literacy skills and an awareness of the social implications of media consumption.

Course Outlines:**1 Introduction**

- What is a Virtual Community and Why Would You Ever Need One?
- Characteristics of virtual communities
- Components of virtual communities

2 Virtual technology and networking

- Designing of virtual communities
- Creating and Exploiting Virtual communities.
- Extending the classroom walls electronically. In New Paradigms for College Teaching.
- Online Communities for Professional Development,
- Contributions of a Virtual Community to Self-Regulated Learning.

3 Tools used in virtual communities

- Miracle of Internet
- virtual communication & marketing

4 Scope and Working of virtual communities

- future of virtual communities
- Identity and Deception in the Virtual Community

- The Art of Hosting Good Conversations Online
- Nine Principles for Making Virtual Communities Work
- Making Virtual Communities Work

Course Description:

The course will provide the knowledge, understanding and skills for social impact assessment and policy formation. It helps in understanding the role of social impact assessment in the broader context of environmental impact assessment. It enables the students to understand conceptual and methodological advances in social impact assessment. It familiarizes with the tools used and methods employed.

Course Outline:**1 Introduction**

- Historical aspects of SIA
- Legislative aspects of SIA
- Contents and phases of SIA
- Introduction to assessment methodologies:
- Checklists & Matrices
- Social Impact Assessment
- Multicriteria Analysis
- SIA Case Study
- SIS Review
- Strategic Social Assessment (SIA)

2 Steps in the social impact assessment process

- Public involvement
- proposed action and alternatives Identification
- Describe relevant human environment and zones of influence
- Identify probable impacts
- Investigate probable impacts
- Determine probable response of affected parties
- Estimate secondary & cumulative impacts
- Recommend changes in proposed action or alternatives
- Mitigation, remediation, and enhancement plan
- Develop and implement monitoring program
- Include interested and affected parties in all steps of the SIA process

3 Stage in SIA process

- Policy/ project settings
- General planning, policy develop preliminary assessment
- Detailed planning funding & impact
- Construct/implement
- Operation/ maintenance
- Decommission/ abandonment

4 Social Impact assessment Variables

- Population change
- Community & institutional structures
- Political & social resources

- Community and family changes
- Community resources

Course Description:

The course "Sociology of Urbanization" examines the social, cultural, economic, and political dimensions of urbanization and their impact on societies. Through a sociological lens, students will explore the processes, dynamics, and consequences of urbanization, both globally and within specific contexts. The course will address topics such as urbanization theories, urban social structures, urban inequalities, urban development, urban planning, and the social and cultural transformations associated with urban life. Students will develop a critical understanding of the complexities of urban societies and the role of sociology in analyzing and addressing urban challenges.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the theoretical perspectives and concepts related to the sociology of urbanization.
2. Identify and explain the social structures, inequalities, and social stratification within urban contexts.
3. Explore the cultural, economic, and political factors that shape urban life and identities and evaluate the impacts of urbanization on community dynamics, social networks, and social capital.
4. Critically examine urban planning and development policies and their implications for social justice and sustainability
5. Analyze the intersectionality of urban issues with other social categories such as gender, race, class, and ethnicity.
6. Apply sociological theories and methodologies to conduct research on urban phenomena.

Course Content:

1. **Introduction**
 - Definition of Basic Concepts
 - Urbanization and Urbanism,
 - Community,
 - Town, City, Metropolis and Megalopolis
2. **Urban Sociology**
 - Scope and Field of Study
 - The Rise, and Decline of Cities
 - Origin of Urban Life
3. **The Rise of Modern City**
 - Growth of Cities
 - Factors in Urbanization and Urban Growth
 - Growth of Cities-planned Development
4. **Trends of Urbanization in Pakistan**
5. **The Ecology of the City**

- Human Ecology-meaning and Relationship with Urban Sociology
 - Location of the City
6. **The Social Relations in the City**
 - The Small Groups - Their Functions and Role Structure
 - The Urban Attitudes, Ideals and Values,
 7. **The Urban Economic System,**
 - Rest and Recreational Activities in the City
 8. **The Disorganized Areas**
 - Slums, Katchi Abadies and Their Development
 - Lack of Coordination in Various Social Systems in the City
 - Juvenile Delinquency and Street Crime in the City.
 9. **Main Social Problems of the Cities**
 - Their Origin, Causative Factors and Remedial Measures.

Course Description:

The course "Political Sociology" explores the intersection of politics and society, focusing on the social factors that shape political systems, institutions, and processes. Students will examine the relationships between power, authority, social structure, and political behavior. The course will cover topics such as social movements, political ideologies, state formation, citizenship, globalization, and the role of social inequalities in shaping political outcomes. Through sociological analysis, students will gain a deeper understanding of the complexities of political systems and the social dynamics that influence political decision-making, participation, and social change.

Learning Outcomes:

By the end of this course, students will be able to:

1. Understand the core concepts, theories, and methods of political sociology and factors of political behavior, attitudes, and beliefs.
2. Examine the relationship between power, authority, and social structure in political systems.
3. Evaluate the impact of social inequalities, such as class, race, and gender, on political processes and outcomes and analyze the role of social movements and collective action in shaping political change.
4. Understand the formation and functions of states and political institutions analyze the dynamics of citizenship, identity, and social inclusion/exclusion in political contexts.
5. Critically assess the role of ideologies and political discourses in shaping political systems.
6. Apply sociological perspectives to analyze and interpret political phenomena and propose solutions for social challenges

Course Content:**Introduction to Political Sociology**

- Defining political sociology and its relationship to other subfields of sociology
- Core concepts, theories, and methods in political sociology

Power, Authority, and Social Structure

- Understanding power relations and social hierarchies in political systems
- The role of authority in shaping political decision-making and governance

Social Inequalities and Politics

- The impact of social class, race, and gender on political participation and outcomes
- Political representation and the challenges of social inequality

Social Movements and Political Change

- Analyzing social movements and their impact on politics and society
- Collective action, social protest, and political mobilization

State Formation and Political Institutions

- Understanding the formation and functions of states
- The role of political institutions in shaping political processes

Citizenship, Identity, and Social Inclusion/Exclusion

- Dynamics of citizenship and its relationship to social identity
- Social inclusion and exclusion in political contexts

Political Ideologies and Discourses

- Examining different political ideologies and their influence on political systems
- The role of political discourses in shaping public opinion and policy-making

Globalization and Politics

- Analyzing the impact of globalization on politics and governance
- Transnational political movements and the challenges of global governance

Political Sociology of Gender

- Gendered dimensions of politics and political processes
- Intersectionality and the role of gender in shaping political outcomes

Emerging Issues in Political Sociology

- Contemporary debates and challenges in political sociology
- Future directions and possibilities in studying political phenomena through a sociological lens

Collective Behavior and Public opinion

- Nature, formation, role, measurement of public opinion
- Individual and collective political behavior
- Determinants-modes, including anomie political behavior

ALLIED COURSES

(Minimum 12 Credit Hours)

Course Description:

The course is designed for beginners with either no formal background or very little acquaintance with economics. It develops the ability to explain core economic terms, concepts, and theories. The objective is to give the students a clear understanding of the basic concepts, tools of analysis, and terminologies used in microeconomics and macroeconomics. Emphasis will be on the use of graphs, diagrams, and numerical tables/schedules for exposition. A country's economy consists of three major economic agents; consumers, firms, and government. Analyzing the choices made by these economic agents is one of the main subjects of microeconomics. Students will learn how the decisions made by economic agents are represented in the market as demand and supply of commodities. Students will also learn about the determinants of macroeconomic conditions (national output, employment, and inflation), aggregate supply and demand, business cycles, public finance, international trade, and monetary and fiscal policy. The teacher is expected to draw examples from the surrounding world to clarify the concepts.

Contents:

- 1 Introduction to economics and preliminaries
- 2 Theory of consumer behavior
- 3 Demand, Supply, market equilibrium and elasticities
- 4 Theory of production
- 5 Revenue and cost analysis of a firm
- 6 Theory of Market Structure
- 7 Firm's Behavior under perfect competition, monopoly, and monopolistic competition
- 8 Introduction to macroeconomics
- 9 National income and various concepts of national income
- 10 Consumption and saving function
- 11 Investment and its types,
- 12 Concept of aggregate demand and supply and their equilibrium
- 13 Concept of multiplier and accelerator
- 14 Monetary and fiscal policies
- 15 Inflation and unemployment (PHILLIPS CURVE)
- 16 Balance of payment problems and remedies
- 17 Public finance and taxation, debt and expenditure

Recommended Texts:

- 1 Mankiw, N.G. (2018). Principles of microeconomics (8thed.). Boston: Cengage Learning.
- 2 Diulio, E. A. and Salvatore, D. (2011). Schaum's outline of principles of economics (2nded.). New York: McGraw-Hill.

Suggested Readings:

- 1 Mankiw N. G. (2019). Macroeconomics (10thed.). New York: Worth Publishers.
- 2 Nicholson, W. and Snyder, C. M. (2010). Intermediate microeconomics and its application (11thed.). Mason, OH: South-Western Cengage Learning.
Froyen, R.T.(2013). Macroeconomics: Theories and policies (10thed.). University of North Carolina at Chapel Hill: Pearson.

Course Description:

This course has been designed to ensure an effective orientation of students towards the discipline of psychology so that they may come to appreciate the diversity of the subject and its pragmatic significance. This course provides an introduction to the concepts and theories of psychology and to their application to real life situations. Topics include history, research methods, sensation, perception, consciousness, stress and coping, learning, memory, motivation and emotions. Main objectives of the course include to make students familiar with the essential features of human personality; to inculcate a sense of personal relevance of Psychology as a subject with the potential of gaining better insight into one's own self and others. Upon the successful completion of course students will have an introductory knowledge of selected areas of basic psychological enquiry and they will be able to: differentiate between scientific and non-scientific information about human behaviors and mental processes, describe major developments and research methods used in psychology; Explain psychological processes involved in sensation, perception, learning, memory, motivation, emotion, states of consciousness and health; Analyze the variety of factors affecting sensation, perception, consciousness, learning, memory, motivation, emotion, and health; and can apply psychological concepts and principles to situations in everyday life.

Contents:

- 1 Introduction to Psychology: Definition of psychology, Goals of psychology, Major schools of thought in psychology, Major fields of psychology
- 2 Basic research Methods in Psychology: Survey research, Experimental research, Case study method
- 3 Biological Basis of Behavior: Brain and nervous system, Structure and function of major brain areas, Neurotransmitters and their functions
- 4 Sensation and Perception: Difference between sensation and perception, Principles of perception, Role of perception in human cognition
- 5 Motivation and Emotion: Concept & Theories of motivation and emotion
- 6 Learning: Definition of Learning, Types of Learning (i) Classical Conditioning (ii) Operant Conditioning, (iii) Observational Learning
- 7 Memory and Intelligence: Definition and stages of human memory, Types of memory, Concept of intelligence, Basic theories of intelligence
- 8 Personality development: Concept & Theories; Tips to improve personality
- 9 Health and Stress, Stress and Coping, Stress, Health, and Coping in the Workplace, Effective Measure to deal with stress and ways to cope.
- 10 Application of Psychology in Our Social Lives

Recommended Texts:

- 1 Weiten, W. (2017). Psychology: Themes and variations (10thed.). Boston: Cengage Learning.
- 2 Nolen-Hoeksema, S. and Hilgard, E. R. (2015). Atkinson and Hilgard's introduction to psychology (16thed.). New Dehli: Cengage Learning.

Suggested Readings:

- 2 Coon, D. , Mitterer, J. O., and Martini, T. S. (2018). Introduction to psychology: Gateways to mind and behavior (15thed.). Boston: Cengage Learning.

Course Description:

This course is designed to educate the students at large, the law, rules, regulations related to daily life. Students should behave and ensure order, predictability and security in some basic fields of life. This course is designed to aware the basic rights and obligations to make the civic. This course will develop basic necessary knowledge, skills and attitude for legal awareness among the students. to enlighten the basic principles and rules regarding basic Fundamental rights of citizens as give by The Constitution of Islamic Republic of Pakistan, Human Rights Laws, Consumer Protection Laws, Environmental Laws and Women Protection Laws in order to gain insight into law and legal system. It will provide basic acquaintance to legal principles and will advance the social justice. Moreover, it will impart light on corners of life that will make the student more vibrant, civilized and law abiding citizens.

Contents:

- 1 The Constitution of Islamic Republic of Pakistan, 1973
- 2 Fundamental Rights Article 8 to 28
- 3 Framework for implementation of Fundamental Rights under Article 184 and 199
- 4 European Convention on Human Rights
- 5 Universal Declaration of Human Rights 1948
- 6 Theory and practice of Human Rights in Pakistan
- 7 The Punjab Consumer Protection Act, 2005
- 8 The Punjab Consumer Protection Rules, 2009
- 9 Environmental Laws
- 10 The Pakistan Environmental Protection Act, 1997
- 11 The Punjab Environmental Protection Act, 1997
- 12 Women Protection Laws The Women Protection Act, 2006
- 13 The Protection Against Harassment of Women at Workplace Act, 2010

Recommended Texts:

- 1 Emanuel, S. L. (2019). Constitutional law. New York: Wolters Kluwer.
- 2 Adil, Z. H. (2014). The manual of consumer protection laws in Pakistan. Lahore: Kashif Law Book House.

- 2 Salzman, J., and Thompson, B. H. (2003). Environmental law and policy. New York: Foundation Press.

Course Description:

This course offers the student a comprehensive introduction to politics, political institutions and issues. The course has four main objectives for the student to: understand what is meant by politics, explore competing concepts and approaches, learn about how political institutions and processes work, and discuss contemporary political issues in an informed manner. While highlighting the main objectives of national life, the course explains further the socio-economic, political and cultural aspects of Pakistan's endeavours to develop and progress in the contemporary world. This course will also be very helpful to expand the understandings of the reader pertaining to the existed contemporary knowledge of the world and to excel his personal capabilities to serve for others. It enhances the skill of students to underpin the understanding about political process, its valuable outcome and how to unleash socio-political activities in our surroundings. It enables the students to understand the political realities about polity.

Contents:

- 1 Definition, Nature, Scope and Relations with Other Social Sciences
- 2 State; Definitions, Elements, Functions, Difference Between State and Society
- 3 Types of Power
- 4 Debates in the Study of Power
- 5 States: State Formation, Development, and Change
- 6 States and Nations: Relations and Interactions
- 7 Constitution: The Highest Law of the Land
- 8 Approaches to Executive leadership
- 9 Government
- 10 Government Functions
- 11 Kinds of Governments
- 12 Presidential and Parliamentary Systems
- 13 Legislatures: Features, Functions, and Structure
- 14 Judicial Institutions: Structure and Design
- 15 Agents of Political Socialization
- 16 Functions of Political Parties
- 17 Bureaucracy and Democracy
- 18 Electoral Systems:
- 19 Single-Member Districts
- 20 Proportional Representation

Recommended Texts:

Course Description:

Studying geography can provide an individual with a holistic understanding of our planet and its systems. Those who study geography are better prepared to understand topics impacting our planet such as climate change, global warming, desertification, El Nino, water resource issues, among others.

This course is graduate-level course to expose students with the founding principles of Geography and geographical knowledge. A systematic descriptive introduction to the diverse elements of landscape including geomorphic, climatic, and biotic elements, human settlement and land-use patterns; cartographic approaches to the analysis of selected processes of landscape change. This course provides an opportunity for understanding part of the complex physical and biological environment in which human beings live. The nature and processes of geo-system and its constituent parts: atmosphere, lithosphere, hydrosphere and biosphere; structure and composition of the atmosphere: atmospheric circulation, weather and climate, energy transmission, spatial variation of energy inputs and energy budget; structure and composition of the earth: tectonics and related processes; hydrological cycle and its components: precipitation, evapotranspiration, groundwater, surface water and the oceans; vegetation zones of the world: world soils, ecosystems, biomes, energy and matter flows.

Contents:

- 1 Introduction, Definitions, scope and branches of Geography
- 2 Roots of the discipline and basic geographic concepts
- 3 Themes and traditions of Geography
- 4 Tools of Geography, The Universe, Galaxies and solar system
- 5 The Earth as a planet, Celestial positions, its shape and size
- 6 Rotation, revolution and related phenomena
- 7 Spheres of the earth, Lithosphere, Atmosphere, Hydrosphere
- 8 Biosphere, Man-environment interaction, Population
- 9 Major Economic activities, Settlements
- 10 Pollution

Lab. Work

- 1 Comprehension of atlases
- 2 Map reading skills, location of places
- 3 Features and relevant work related to topics of the theoretical section.

Recommended Texts:

- 1 Arbogast, A. F. (2007). Discovering physical geography. London: John Wiley and Sons.
- 2 Christopherson, R. W. (2009). Geo systems: An introduction to physical geography. New Jersey: Pearson Prentice Hall.

Suggested Readings:

- 1 Strahler, A. (2013). Introduction to physical geography. New Jersey: John Wiley & Sons.
- Seamon, D. (2015). A geography of the life world; Movement, rest and encounter. New York: Routledge.

Course Description:

The course aims to equip students with an understanding of GIS, evolution and applications of spatial data. In this class, students will be introduced to the study and design of maps, primarily through the application of a specialized computer mapping software program known as a Geographic Information System (GIS). GIS is a map-based computer decision support system that allows for the investigation of geographic data relationships. People that are trained in GIS are in high demand today, both in government and private industry. It Improves decision by government officials, Instantaneous collaboration through the cloud, Improved transparency for citizen engagement etc. The lecture sessions in this class will focus primarily on GIS-based mapmaking techniques, including map design, symbology, map coordinates and georeferencing systems. Students will cover many important aspects of mapmaking, including map data collection and processing, field methods and GPS, cartographic communication, topographic map reading and analysis, and qualitative and quantitative mapping techniques.

Contents:

- 1 Introduction: Definitions, key components, functional subsystem, Raster data model
- 2 Vector data model, attribute model, Data acquisition techniques, data sources
- 3 Data capturing techniques and procedures, data visualization of spatial data
- 4 Layers, projections and transformation and datum
- 5 Map design: Symbols to portray points, lines, polygons and volumes
- 6 Graphic variables, visual hierarchy, Data classification graphic approach
- 7 Spatial analysis: Neighborhood functions, network, and overlay analysis, buffering
- 8 Spatial data quality, components of data quality, micro level components
- 9 Macro level components, usage components, sources of errors
- 10 Accuracy and resolution and uncertainty
- 11 GIS Applications

Lab. Work:

Introduction to GIS Lab (hardware/ software), Raster/ Vector/ Attribute Data Display, Scanning, Digitization, coordinate based point mapping, Raster/ Vector Conversion,

Recommended Texts:

- 1 Chang, K., (2006). *Introduction to geographic information systems*: New York: McGraw-Hill
- 2 Demers, M. N. (2002). *Fundamentals of geographic information systems*, US: John Wiley & Sons.

Suggested Readings:

- 1 Yang., Lo, C. P., and Lal, A.K. (2003). *Concepts and techniques of geographic information system*. US: Prentice Hall.
- 2 Kiser, J. D., Paine, D. P. (2003). *Aerial photography and image interpretation*, US: John Wiley & Sons.
- 3 Janssen, L. L. and Hurneman, G. (2000). *Principles of remote sensing*: Netherlands: International Institute for Aerospace Survey and Earth Sciences
